No. 61 Spring 1998

The new domestic postal chess season is now well underway with our normal range of individual tournaments and the League, comprising of its usual three divisions. The 1997/8 Championship looks like producing a close finish with more than half of the games completed already. There is a new development in Division 3 of the League, with each player having two opponents (4 games) - an experiment which could well be extended throughout, in future.

The Semi-Finals of the Bernard Partridge Memorial have begun with 4 sections, the top 3 players from each section due to qualify for the Final, which is planned to begin in the Millennium year (see pages 32/33).

Your Association now has its own WWW site, due to the excellent work of Iain Mackintosh and Jim Falconer, although like all new sites, it will be "under construction" for several months with new information being added progressively. You can find us on

http://www.users.globalnet.co.uk/~scca

Since our last edition, the Canadian team in the XI Olympiad Final has joined us in third place with 40/72 points (both now completed). Although Russia could still overtake us to claim the bronze medal place, they will need to score at least 5½ points from 9 games, which is far from certain. However, Scotland and Canada have secured places in Final XII, which will begin in early May - further details of our teams etc on page 2. Our three teams in the Email Team Tournament are progressing well and we are hopeful of having representation in the Final Section.

In this edition, we feature a concluding interesting article from Ian Marks before he takes his "sabbatical" and also two excellent contributions from our latest title successes, Joe Watson (IM) and Tom Thomson (½ IM). Due to shortage of space, we have had to curtail the Games Section, although we would appreciate more annotated games for the Summer and Autumn editions. As we go to print our Games Editor, George Pyrich, is embarking on a new phase of life's journey with his marriage to Catherine - we wish them great happiness in the years ahead!

The Annual General Meeting of the Association will take place on Sunday 7th June 1998 in a new and interesting location! We hope to see plenty of our members at the AGM - it could be combined with a nice day out in the Borders! (See notice on page 2)

Note from the Secretary, Alan Hind

Over the last few years there have been a number of occasions when I have had to come to the aid of a Tournament Director in his front-line attempt to deflect hostile comments from competitors. Such disputes are inevitable and yet many could be avoided if players took time to give consideration to their opponents and did not react immediately to an apparent slight. This is not to say that many competitors cause problems - given the competitive but friendly nature of our organisation, I am pleased to say that such events are infrequent!

One of the main causes for concern in the last few years has been the recurring question of re-used envelopes. Our rules specify that "suitable envelopes" should be used. It is acceptable to re-use envelopes only:-

- (a) where the previous computer readable fluorescent dots do not appear (otherwise there are delays and potential postal transmission problems due to misreading and/or the necessity for manual sorting);
 and
- (b) when the envelope remains in a fit condition to be sent.

When these conditions do not prevail, I would interpret the Rules as having been breached and support any Tournament Director's imposition enforcing the usage of a new envelope for each subsequent posting and a time penalty on any further infringement.

The above "sermon" is for the benefit of all players. Delays are often the principal reason for spoiling the enjoyment of games, particularly if the games have a tight adjudication date. What we really want to see at the end of each season is that all games have been concluded without recourse to adjudication.

[Editor's comment: I do believe that it is reasonable to expect both players to acquire a supply of window envelopes to play their games. One way to try to "encourage" this is to always seal the envelope - in the past, I have received only a scorecard because the re-used envelope has simply fallen apart with constant re-use! So come on, offenders, an envelope costs only a fraction of the price of the stamp you are affixing!]

NOTICE OF ANNUAL GENERAL MEETING

The Annual General Meeting of the Scottish CCA will be held at 4.00pm on Sunday 7th June 1998 at The Ginger Jar Coffee Shop, Galashiels.

The Agenda will be:-

- 1. Apologies
- 2. President's Remarks
- 3. Minutes of previous AGM
- 4. Secretary's Report
- 5. Treasurer's Report
- 6. International Secretary's Report
- 7. Election of Office Bearers
- 8. Election of Auditor
- 9. Subscriptions
- 10. Any Other Business

If any member wishes to raise any item of business, notification should be in the hands of the Secretary by 10th May 1997 at the latest.

Scotland's New Olympiad Teams

The Scottish CCA Selection Committee (George Pyrich, David Kilgour and Tom Thomson) has chosen the following teams to represent Scotland in the next Olympiad Final and the Preliminary Sections. Unfortunately, several of our leading titled players are unavailable. It was decided to select teams which, hopefully, would give us a chance to either requalify from a top three placing in Final XII or from a top two position in the Prelims. Our leading player, David Kilgour, will play top board for both teams - a considerable commitment!

Final XII David Kilgour, Colin McNab, Phil Giulian, George Pyrich, Tom Craig, Joe Watson David Kilgour, Alan Borwell, Simon Gillam, Tom Thomson, George Sprott, Douglas Neil

With new European Team Tournament and North Atlantic Team Tournaments likely to begin within the next two years, there should be plenty of opportunity for other strong players to be included in future Scottish teams.

CHALLENGE TOURNAMENT

[by Bernard Milligan]

Congratulations to the following players who won medals in last season's competition: D.G.Meldrum, D.R. Cumming, G. Lloyd, A.C. Robson, D. Salter and G. Plant. Strong performances by 14 players earned them promotion: R.B. Crosbie, G. Lloyd and E. Sowden are all promoted to Class 1. C. Dowell, G.R. McDonald, D.G. McRoberts, A.R. Petrie, G. Plant and D. Salter go up to Class 2. R. Malcolmson, D.G. Meldrum and M. Moran rise to Class 3, and finally, P.Wildig and A.C. Robson are both promoted to Class 4.

Disappointingly the number of entries at the start of the 1998 season was slightly down on last year. On the brighter side we currently have 55 players taking part in the Challenge Tournament, compared to 44 at the same time last year. This clearly shows the number of players who join the competition mid-season so be prepared to receive further opponents as and when called upon.

Novag Sapphire has again entered the ring after its convincing performance last season. I am still looking for the first Human opponent to wipe the floor with the silicon beast and take a full point off it. Only Michael Lane managed to hold his own against it last season. Anyone specifically not wanting to be paired against it must drop me a note to let me know.

To avoid any possible postal delays, players are reminded that they should always use a fresh envelope when posting their cards to their opponents. Computerised sorting can mean that when envelopes are reused that more than one set of bar codes/fluorescent dots can on occasion cause the card to take a round-about route to be delivered. Such delays can mean that fewer moves get played and can spoil your enjoyment of the game. In any case, it is not fair to expect one player to pay for an envelope and not the other. I am sure that continued goodwill will result in this practice disappearing.

The Black Knights' Tango

Georgi Orlov

Outwit your opponents from move 2! The Black Knights' Tango - 1 d4 Nf6 2 c4 Nc6!? - is one of the few openings to combine soundness with surprise value, and has been played with success by top US GMs Yermolinsky, Benjamin, Shabalov and Dzhindzhikhashvili. Georgi Orlov, the 1994 US Open champion, provides a complete repertoire including unique Tango lines as well as transpositions to other openings.

The Grand Prix Attack

Gary Lane

The attacking lines with f4 against the Sicilian were popularised on the British Grand Prix circuit, and Grandmasters Hebden, Hodgson and Short have used them to score many devastating victories. White's main aim in many lines is a quick, and often sacrificial, kingside attack, but the opening can be treated positionally and the Grand Prix is a powerful weapon at all levels of chess. Gary Lane provides thorough and objective coverage of all lines after both 1 e4 c5 2 f4 and 1 e4 c5 2 Nc3 with 3 f4.

Analyse to Win

Byron Jacobs

Most games are won or lost in the few critical moments when the accurate calculation of variations is vital, yet few players pay sufficient attention to improving this area of their chess ability. Byron Jacobs gives practical advice on how to handle such crucial decisions, whether you are on the attack, in defence, in the middlegame or in the endgame. Includes a wealth of exercises to hone your analytical skills.

BATSFORD

Batsford Chess Online: www.batsford.com

by ian marks

SG: "Man cannot live without seeking to describe and explain the Universe."

Sir Isaiah Berlin

IM: "Write to amuse? What an appalling suggestion! I write to make people anxious and miserable and to worsen their indigestion." *
Wendy Cope, Serious Concerns

Our last (first!) look at The Big Match (no. 47, Sept. '94) revealed eight decisive games out of the first nine, a splendid piece of propaganda for the anti-draw lobby. However, games ten to fourteen reveal the protagonists in the throes of their respective mid-life crises, with no sign of Campo to call the proceedings off:

Gerz (4½) 0 ½ ½ ½ ½ Mar (4½) 1 ½ ½ ½ ½

Not that the games have been bori...z.z.z.z. No, seriously, they've been nothing if not interesting, all 410 moves of 'em. Against a player of Stephan's style, how could they be otherwise!? The crack's been pretty good, too.** Here's epic no. 14. As before, our comments were written independently; Stephen's words are marked SG, mine IM.

White: Ian Marks

Black: Stephan Gerzadowicz

CC Friendly 1996-97

Modern Defence B06

1 e4 g6 2 d4 Bg7 3 Nc3 c6 4 f4

IM: I once branded this and the follow-up 'too rigid' ("I have my own opinions...but I don't always agree with them." - George Bush), but it's surely the acid test of Black's set-up.

4 ... d5

IM: The Gurgenidze, A Stephan speciality.

5 e5 h5 6 Nf3 Nh6 7 Be3 Bg4 8 h3

SG: Ian knows this stuff too well. The old Be2 lines are easier on Black. White's most promising plan is space grabbing on the Queenside with b3 and c4. For this he wants the King's Bishop on f1-a6, not on f3 after ... Bxf3; Be2xf3.

And what should Black be doing? If he works for ... c5 White's bad Bishop pushed the Pawn from d4 to c5, and gains virtue. No good.

So ... b5!? But if b3 and c4 and a file opens White will be faster to get TWO Rooks over there, and that spells penetration. So Black must catch up in development before looking at ... b5. But by that time White will be too far advanced over there

So (?) it's passive defense or ... f6.

"Life may be seen through many windows, none of them necessarily clear or opaque, less or more distorting than any of the others." Isaiah Berlin

IM: Older games usually saw White playing Be2/g3 (to stop ... h5-h4) /h3/...Bxf3/Bxf3, a laborious plan which generally allowed Black a comfortable game. White would go on to castle Q-side, but Black is handily placed to meet that (... Qb6/Qa5; ... Nd7-b6-c4/Na6-b4; ...a7-a5/b7-b5 etc.) The idea behind 8 h3 is simple: to keep the KB on the more productive f1-a6 diagonal, castle short and play on the Q-side with b2-b3 and c2-c4. The hole on g3 is traded off by the potential weakness of the Ph4.

8 ... Bxf3 9 Qxf3 h4 10 Bd3 e6 11 Bf2 Bf8 12 0-0 Nf5 13 Ne2 IM: To clear the way to get things going on the Q-side. f3 might also become an option for the knight (Ph4!) later on. You never know.

13 ... Nd7

IM: 13 ... Na6!? was MarGerz X.

14 b3

IM: If MarGerz XVI hadn't begun 1 d4 g6 2 Nf3!? f5! (unclear after nine moves), I'd have been tempted to play 14 a4!? here, to nip Black's ... Ba3 in the bud. Maybe another time.

14 ... Ba3 15 c4 Kf8

^{*} Would I do a thing like that..?

^{**} Note to Narcotics Branch: crack - Scots/Irish patois; gossip, chatter, banter. Honest, fellas.

SG: I knew that Motseev-Schneider 1991 was drawn after 15 ... Rc8 16 Rab1 a5 17 Rfd1 Kf8 18 Kh2 Nb8 19 Nc3.

"Knowledge does not set us free from the dilemmas of human choice." Isaiah Berlin

But I didn't want a draw - and I feared an improvement. I could suspect an improvement because my opponent gave me the book in which I found that game.

(IM: "Life's too slippery for books" - Dr Hannibal Lecter in The Silence of the Lambs)

SG: "A work of art is no good if it doesn't provoke a furore." - Isaiah Berlin.

16 Rab1

IM: 16 Nc3? Bb2 is strictly for the wee small hours of a blitz session.

16 ... Qe7 17 Nc3 a6

SG: Not liking 18 cxd5 cxd5 19 Nb5 - but not liking the move played either.

"We are doomed to choose, and every choice may entail an irreparable loss." Isaiah Berlin

18 c5

IM: Reminding the Ba3 that it's a bit out on a limb.

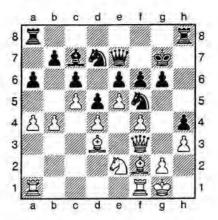

18 ... Bb4 19 Ne2 Ba5 20 b4 Bc7 21 a4

IM: Both sides have achieved pretty much what they want. Stephan is well dug-in and I'm on my way to a Big Position on the Q-side.

21 ... Kg7 22 Ra1

IM: To be challenging the a-file in the event of a pawn swap.

22 ... f6!

SG: Realistically I felt passive defense would lose on the Queenside.

"When a man speaks of the need for realism one may be sure that this is always the prelude to some bloody deed."

Isaiah Berlin

So (?) I open another wound.

IM: I like it! Black has to do something to distract White from his schemes on the other side of the board.

23 Rfb1 fxe5 24 Bxf5!

IM: Now it's my turn to gum up Black's play on 'his' side of the board, since 24 fxe5 Rhf8 gives him a handy open file. 25 dxe5 runs the risk of leaving the Pf4 (and maybe the Pc5 after b4-b5) weak. Another virtue of the move is that it weakens d5, more of which anon.

24 ... exf5 25 fxe5

SG: I expected 25 dxe5 so he could use the d4 square.

IM: 25 dxe5 is doubtless playable, but this is consistent of my plan of b4-b5 (dxe5 still weakens c5). Besides, I've seen An Idea.

"We cannot see anything until we are possessed with the idea of it, and then we can hardly see anything else." Thoreau, in his Journal

25 ... b5

IM: A radical way of dealing with b4-b5.

26 axb5 axb5 27 Nc3 Rhc8

SG: Planning (optimistically?) ... Qd8, ... Rxa1, ... Ra8. And I hadn't decided if I could let the h-pawn go or need (laboriously) play ... Bd8, ... Qf8, ... Be7 first.

28 Nxd5

IM: Here it is, what Spielmann would have called a 'pure' sacrifice. I can't prove that it wins, and I'm willing to be shown that it loses (hence no !s or ?s), but I'd play it again tomorrow, against anyone.

28 ... cxd5 29 Qxd5 Qe8

SG: Holding a8 rather than h4.

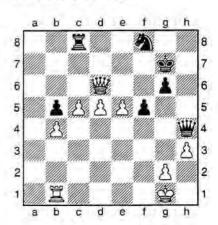

"(Men) live by positive goals... a vast variety of them, seldom predictable, at times incompatible." Isaiah Berlin

IM: Black has to concede something: the a-file after ... Rxa1 (or Rab8), or h4 if he chooses to hold the file. Stephan decides that positional considerations outweigh material ones (often the sensible course).

30 Bxh4 Nf8 31 Rxa8 Rxa8 32 Qb7 Qb8 33 Qc6 Bd8 34 Bxd8 Qxd8 35 d5

IM: d4 was attacked! Probably 35 Qd6 is also playable, but I wanted his rook off a8 before playing that.

35 ... Rc8 36 Qd6 Qh4!

IM: Even if Black can't afford to exchange queens, this is good in its own right, activating the queen and reminding me that my own back ranks are draughty, especially with my own queen stuck in front of the pawns. The annoying thing is that 37 Ra1, to seize the open file, runs into ... Qd4+. Rats.

37 e6 Qe4 38 Rb3

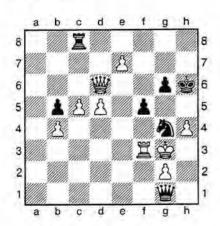

IM: Safe as houses here, and the

38 ... Kh6 39 e7 Nh7 40 h4!?

SG: I felt I had been making "boxes" (only moves); was surprised White gave up g4.

IM: I was proud of this, but probably my pride is more paternal than realistic. The idea is to undermine f5, clear d6 and come in down the f-file, and in general try to exploit the slightly shaky position of the black king. 40 Qd8 should be the move, but it allows an immediate draw (neither of us wants a draw!): 40 ... Qe1+ 41 Kh2 Qe5+ etc. (Can't allow 42 Rg3 f4.) Anyway, now we get a little tactical flurry.

40 ... Qd4+ 41 Kh2 Nf6 42 Rf3 Ng4+ 43 Kg3 Qg1

IM: Interesting! My next move helps avoid mate (!), but it's what I've been angling for.

44 Rxf5 Qh2+ 45 Kxg4 Qxg2+

IM: Taking on d6 and f5 loses to the pawns.

46 Kf4

IM: 46 Qg3 gxf5+ 47 Kf4 Qe4 is a reminder that the gremlins tend to strike just when you least expect them.

46 ... Qf2+ 47 Kg4 Qxf5+ 48 Kg3 Kh5

IM: Presumably so my next move isn't check.

SG: Arrgh. Allows a draw at once. Black must try 48 ... Qd3+.

Maybe it's still a draw but what bothers me is that I didn't even see the game continuation. Bothersome! Worrysome!

Ah well, at least it's not Allsheimer's Disease. Boston Globe columnist Harold Dondis says that if you can spell Allsheimor's you probably don't have it.

IM: Doc: You've got terminal cancer and Alzheimer's.

Guy: Gee, that's terrible. Still, at least I don't have Alzheimer's.

What's going on!? Then I realised it's a perpetual.

49 Qf4 Qxd5 50 Qg4+ Kh6 51 Qxc8 Qd3+ 1/2-1/2

This is my swansong. Coda: With middle age tightening its grip, I've decided to take a sabbatical from the sixty-four squares and indulge my other interests. Looking back, I was surprised to see that the first B 'n' P appeared in no. 31 in August 1989. A lot of water has passed under the bridge since then: we're on to our third Prime Minister and second American President (the way things are going, it might well be the third by the time you read this ...); the Berlin Wall, communism and apartheid have passed into history; there was war in the Gulf and in the former Yugoslavia: the horror of Dunblane; scandals, crises....

My thanks to those who expressed their appreciation for the articles. I won't let on who you are and, anyway, counselling is available. I might sneak up on you with the occasional B 'n' P; until then, let me leave you with the thought which every chessplayer should bear in mind:

BATSFORD

Analyse to Win by Byron Jacobs 144 pages, £14.99

This is a useful book for players wishing to improve their analytical skills. Inspired by GM Kotov's book Think like a Grandmaster, this author tries to guide lesser mortals through some typical themes likely to be encountered in regular practice. There is a nice balance between offensive and defensive situations, with a dozen test positions at the end of five varied chapters.

The Grand Prix Attack by Gary Lane

by Gary Lane 176 pages, £13.99

An opening likely to disturb the most resilient Sicilian exponent! 1 e4 c5 2 f4 or deferring to 2 Nc3 and then 3 f4 are covered in this excellent book by one of the best modern chess authors. For CC players, some of the more dynamic variations such as the Fianchetto Gambit (7 f5) could create positions which are less well analysed and encourage creativity.

Beating the Indian Defences by Burgess and Pedersen

192 pages, £13.99

An appealing title, but many of the lines advocated are already heavily analysed so new material is scarce. I am not sure that one book can really cover the white side for combating the wide range of "Indian Defences". Ten separate chapters in this book, mostly with a single main theme for the combatant. Up-to-date games reference material.

The Black Knights' Tango by Georgi Orlov

128 pages, £12.99

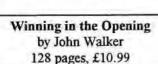

You may ask - what is this!?

Well, this provocative opening for Black is increasing in popularity with some top GMs venturing into its complexities. It begins 1 d4 Nf6 2 c4 Nc6!? Black certainly "calls the tune" and the knights frequently go into a kind of tango (and sometimes a The author uses his "tangle"!) practical experiences with the opening. along with interesting references and ideas, to present a very interesting book.

Cadogan Chess Books

Creative Chess by Amatzia Avni 157 pages, £12.99

This is an expanded edition of the earlier (1991) book published by Pergamon. Uses some 10 central concepts, such as unusual positioning or functioning of pieces, subtleties of move orders, being alert to explore apparently absurd moves, etc. There are also useful exercises/tests aimed at developing creativity, an essential for successful CC nowadays!

The worst way to lose a correspondence game is to blunder or fall to an opening trap, so this book is one to help you avoid such a disaster rather than achieving a "quick kill"! There is a topic covering "Getting Castled - fast" but maybe our good friend Nickolai Gurtovoi would need more convincing!?

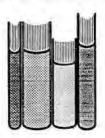

Improve your Chess Now by Jonathan Tisdall 224 pages, £14.99

A very useful self-improvement manual written by a very interesting and experienced chess coach. Full of creative and novel ideas for developing chess skills, GM Tisdall uses various themes to explain his ideas, such as some radical challenges to previously accepted valuations of the chess pieces.

I must return some time to study this book in more detail - I suspect that it would provide a useful refresher when one feels that creativity is waning!

> An Opening Repertoire for the Positional Player by Gufeld and Kalinchenko 192 pages, £12.99

The rather belated publication of this companion volume to An Opening Repertoire for the Attacking Player is nevertheless a welcome arrival. I must confess that I am more attracted to the first book by instinct, but it is interesting that this one on positional play includes openings such as the 4 Pawns Attack against the KI, the Trompowsky and the Sicilian c3!

Chess Press Opening Guides

The Trompowsky by Joe Gallagher 144 pages, £14.99

The Semi-Slav by Matthew Sadler 160 pages, £14.99

The French Advance by Tony Kosten 144 pages, £14.99

Continuing this excellent, if rather over-priced, series of specialist opening guides, each containing around 100 selected recent games. Ideal sources of material and novelties for use in CC play, with nice balance between theoretical explanation and analysis, with attractive presentation.

Gambit Publications Limited

The first two books received for review from these new publishers:-

My Best Games of Chess by Vishy Anand 240 pages, £15.99

Contains 40 deeply annotated games selected by the talented winner of the recently concluded FIDE World Chess Championship eliminator. There is also a final chapter containing 30 selected positions inviting the reader to find the winning combination.

Secrets of Practical Chess by John Nunn 176 pages, £14.99

John Nunn describes ways to improve your chess performance, including How to Study Openings, How to Make Decisions, Avoiding Mistakes, How to use Books/Databases. This fine writer shares his considerable experience for the benefit of developing players.

Winning Chess Brilliancies

by Yasser Seirawan 260 pages, £9.49 Published by Microsoft Press (USA)

A fascinating excursion through a dozen of the most brilliant chess games ever played. Seirawan introduces the historical atmosphere at the time each game was played. He then provides very extensive descriptions after every move, with analysis and instructive commentary.

Winning with the English Opening by GM Andrew Soltis Revised Third Edition - Chess Digest 180 pages, £11.95

This is an updated version of the first two editions published in 1982 and 1987. It contains new and more recent material/games, covering all main variations involving 1 c4 and 2 g3 as its "winning" theme.

Masterpieces of Attack The Brilliant Games of GM Marcel Sisniega Campbell Chess Digest - 300 pages

An unusual book about the games of this Mexican (ex-USA) player who has won many tournaments in Central America and Mexico. Contains 663 games, including wins against Anand, Yusupov, Illescas, Romanishin, etc!

Pelikan Memorial Email, Section "B"

[by Joe Watson]

I was very pleased to be nominated as one of Scotland's two representatives in this Memorial Tournament. Alan Borwell was the other nominee, but he is as overworked as always, and actually it was Tom Craig who started the tourney in his stead.

First, a few words about International FIDE Master Jiri Pelikan, a Czech who died in Argentina in June 1984, at the He played a lot of age of 78. international tournaments, including the Olympiads of Varsovia 1935. Stockholm 1937 and Buenos Aires representing Bohemia and He was in Buenos Aires Moravia. playing the Olympiad in 1939, like many other chess masters, when the 2nd World War started. He could not go back to Prague, and decided to stay in Argentina. Around 1950, he played correspondence chess, winning the Correspondence Argentine Championship, and participating in the ICCF Olympiad. His name has been mentioned many times in the opening books, particularly in the so-called Lasker-Pelikan," "Sicilian "Sveshnikov."

About the Tournament

Well, well, so I made it. I must say that gaining the title was not in my mind much in the early days of the tournament, given that the fifteen players in it included four graded 2500 and above, and another four graded from 2415 to 2460. A score of 8.5 points (or plus three in chess parlance) for the title seemed too tough a target for me, but I managed five wins to more than offset my two losses. I might even have scored more points, but surprised at least one player with a draw offer in the last few weeks of 1997 - I wanted to get the title qualification for Christmas, playing on for more when it is not a team competition seemed unnecessary.

Add to the obvious strength of the opposition the fact that I decided to play openings new to me, and you can understand that my early ambitions were pretty modest. I am not very bookish, and my opening knowledge is

scant, so my repertoire is fairly narrow. That has some advantages, especially if you back it up with a decent chess library and database, but not when you find so many of your own games on popular databases like Ultimate! So, it seemed to make sense to vary my openings more, especially with Black, hence by first Slav Defence (good, interesting draw with Tom Craig), Caro-Kan (not so good, crushed by Luis Quaresma, 2460), Scandinavian (good, pleasingly quick win against Mario Frank).

This is my first Email chess tournament. My first words in it were pretty close to being my first attempts at this form of communication. A tough chess tournament is not the ideal way to learn about Email, and I must confess I found it all very strange, even daunting at times. That said, if you have any experience of Email, you will probably find it a doddle.

The first thing that strikes you is the sheer speed of it all, especially in the early stages. In an ordinary postal tournament with fourteen opponents, you might find yourself receiving half a dozen cards with moves every few days. Not so with Email. You can easily find yourself looking at a dozen chess moves coming in every day! I kid you not. If you reply instantly, you only find you have another dozen to look at the next day, or even the same day. The pressure seems intense at times. In just ten months (we started in March 1997) I started and finished 13 games. Overall, 142 of the 210 games were over in this period. You might think that there only needs to be a thinking time of two or three days a move for Email chess, but in practice that just will not do. The allowance is four days a move, and that was not enough to prevent me clocking up a first etl (you are allowed one per game, and first etls seemed common), and very nearly a second (fortunately in a different game). The fact that there is often virtually no time between sending a move and getting a reply means in some games you will definitely use up to your maximum allotted time. In

snailmail, it is very easy to cogitate for a week or more on your opponent's expected reply, then to make your move instantly at no time cost. That procedure is quite likely to cost you the full seven days thinking time in Email chess

One opponent from Moscow, who happens to be disabled, also happened to be the fastest of my opponents. We reached move 20 or so in a complex and highly topical King's Indian Defence, with only a couple of days on his clock, and many many more on mine. He was better too, and I had to work hard to draw. Still, you can hardly complain at that, given how horribly slow and uncertain the Moscow postal system can be. There is a clear advantage to Email chess where the post is unreliable.

Perhaps it's just my inexperience, but odd things go inexplicably wrong in Email. My system seems to add a column of chevrons to every move transmission from me, irritating some opponents. Often people do not use their surnames in their Email address, so it can sometimes be hard to check the history of events. It's not too bad when Tim Runting calls himself "trunting", but it can be awkward tracing Hans Hoffstetter, who uses the name IsiMattini! My moves to one opponent went to another individual, consistently and irretrievably, to his and my irritation. This was not happening to any other opponent of his, identical address! the using Fortunately, he could use another Email address, so we could eventually continue the game.

But I've only myself to blame when it came to notifying Juan Morgado, and my opponents, of my holidays. One opponent sent me his holiday notification. When I replied telling him about my own holiday dates, my system said he had sent a "group message" and I could do the same. Brilliant, I thought, that will save me 15 individual messages, so I happily sent a group message back. Some messages arrived safely at their

my system had (quite rightly) filed my record of the transmission under the name of the opponent who sent me the original message. Understand that?.....no, I didn't either, for ages! Well, you live and learn.

So, my experience was not without the occasional trauma. But it is nice to have problems sorted out reasonably quickly (through Email, of course), and although I felt lost in a fog of incomprehensible problems from time to time, by and large people understood that and helped me out. I would be happy to play Email chess again, and I am happy to recommend it to others, too!

But this must be wrong... all White is doing is helping Black develop and control the e-file.

Black has a simple strategy in this sort of position. He must develop quickly and pointedly, and attack swiftly. White is clearly going to suffer on the open e-file. He is also potentially exposed around the black squares on his Kingside, but for the moment this is partially masked by the white pawn on d4.

To make quick progress, Black needs to hammer away at this pawn, and anything defending it. If it disappears, either due to capture or being forced forward to d5, Black's pressure on the black diagonal from a7 to g1 should win him the game. On the other hand, White is two pawns up, and in the thoroughly unlikely event of him getting his \(\tilde{\Delta}\) safe and grovelling his way to a decent development, he must win.

One of the remarkable things about Email chess is the sheer speed of play. When moves whizz through the ether at lightning speed, you can find yourself with a reply to your morning move before lunch, even if your opponent has spent an hour or two working out his answer. But maybe Mario should have taken more than two days for all his moves in this game. He is, after all, allowed four days for each of them.

My First Big Tournament

[by Tom Thomson]

I was very happy the day George Pyrich telephoned and asked if I would like to play for Scotland in the European Team Championship Preliminaries, so much so I could not get to sleep that night (somehow CC has this effect on me!).

When the pairings arrived, it was obvious that this would be my most difficult test to date and I had no idea how I would fare at this level (I did not want to be crushed at least). I had none of my opponents' previous games to look over so I just began play and aimed for positions that I like. On the plus side, there was an IM norm up for grabs at 6/9, thus providing me with a target score. My first game to finish was against the Welshman, Martyn Griffith, and I was very pleased (and relieved) to earn my first point for the team.

ICCF INDIVIDUAL TOURNAMENTS

(by George Pyrich

Unfortunately, we missed out our last issue as I was moving house! So, we have a substantial list of new entries to report. Numbers 22 to 34 below were those unallocated last time whilst those from 35 onwards are new. We ended 1997 with a fairly healthy 43 entries (according to my records, our best yet!) and we've had 10 more after the New Year.
