Editorial

No. 65 Spring 1999

As we go to print, it does appear that Spring has arrived, although our Cricket Club's first match was abandoned, due to blizzard conditions at Freuchie!

On the domestic chess scene, all of the new season's tournaments are now well underway, but there have not yet been many results reported. In the 1998/9 Championship, Simon Gillam looks well placed, and in the Candidates, our Games Editor's impressive 100% score has been dented by Gordon Anderson! Dave Hughson and Alan Brown have both completed in Section B with excellent scores to qualify for the next Scottish Championship.

The Bernard Partridge Memorial Semi-Finals are progressing well, although Section 4 is lagging behind a little. Sadly, we learned that Mrs. Partridge died at the turn of the year, and we send our sincere condolences to the family.

Internationally, the most significant news has been the great achievement of Estonian Tonu Öim in winning his second World CC Championship - many congratulations from Scotland!

We have five players participating in the first Email World Chess Championships, which are sponsored by "New in Chess". There are 14 Semi-Final sections, each with 11 players, and the top two from each section will qualify for the 1/4-Finals, from which the top players will compete to be the first ever Email World Chess Champion!

In the Olympiad XI Final, Russia lost its final game and therefore failed to join Canada and Scotland as Bronze medallists (medals to be awarded in Thun. Switzerland in September).

Our Summer edition is planned for publication in August.

◆ Don't forget the AGM ◆

NOTICE OF ANNUAL GENERAL MEETING

The Annual General Meeting of the Scottish CCA will be held at 4.00pm on Sunday 13th June 1999 at The Ginger Jar Coffee Shop, Galashiels.

The Agenda will be:-

1. Apologies

2. President's Remarks

3. Minutes of previous AGM

4. Secretary's Report

5. Treasurer's Report

International Secretary's Report

Election of Office Bearers 7.

Election of Auditor

Subscriptions

10. Any Other Business

100 CLUB

This is a club for members who would like to help with the development of the Scottish Correspondence Chess Association. Currently there are almost 80 units issued but we need to increase this to 100 - please help us!

The subscription is only £1 per month per unit, with two prizes each month currently approx £24 and £16 respectively - members may apply for more than one unit if they so wish!

A monthly bankers order form can be obtained from our Treasurer, David Kilgour, "Willowbank", Peebles Road, Galashiels, TD1 1TH. If you return it to him before the 10th of the month, then you will be eligible to be in the draw for that month.

Recent Winners:		February	March

Making Progress

[by Tom Thomson]

Recently, I had spent some time wondering why I am still mad for CC after all these years, (some players will think it is only 12 years!) and came to the conclusion that it is because I am still making progress with CC. I won the first tournament I entered and I believe that was a very significant factor in my seeking and gaining more success. Those early days were the most exciting for me; I could hardly wait for the SCCA magazines so I could see how the tournaments were shaping up. I entered the SCCA 1987 Major Section B and won with 71/2/10 ahead of Ray Burridge. Here are two games I enjoyed that year. There are mistakes to pick on, but as we go on to the later games. there will be less mistakes as I get better and so does my opposition.

è

SCCA Major Section B, 1987

This was a surprise, I had BCO as my main reference book at this time; I do not think it was covered.

> 16 exf5 17 全d5 增b7

I later bought John Nunn's book "Najdorf for the Tournament Player" which I found to be an excellent book on this opening. I found 17 ... 世b7 had already been played in a CC game Klostermann - Popescu 1972-3 which continued 18 exf 堂d8 19 兔g2 兔d7 20 笛he1 兔c6 21 世e3 堂d7 22 b4 兔a4 23 兔e7 兔xg2 24 畐xd6 堂xd6 25 쌀e5+ 堂d7 26 畐d1 堂e8 27 兔c8 兔e7 28 兔d6+ 堂f8 29 fxe 堂g8 30 쌀g3 mate. This was a very nice game from White and shows what can be done from such positions. John gives 17 ... 쌀a5! as Black's best.

John Nunn became my favourite chess author as he wrote a lot of good books in the late eighties and early nineties and I built a library for CC reference (not for learning lots of openings for OTB!)

After these first results I gained my first SCCA rating of 1610. This was higher than my OTB rating and I was happy with this achievement, along with qualifying for the SCCA Premiers 1988-89. Here is a game from that tournament in which I tied for first with Dave Gibb and qualified for the Candidates. Dave plays a quality game here which shows the strength of play that can be seen in SCCA Premiers. I firmly believe that Dave could have gone on to be one of Scotland's top players and represent his country if he had just taken the game more seriously. I spoke to Dave after the section was completed at the OTB Congress in Perth and he informed me that he had been working out the moves in his head while at work!

Now that I had qualified for the SCCA Candidates and my grade jumped up to 1820 (1820 is the highest my OTB rating has been but I do not take that game seriously any more - no more feeling like my head is going to explode! . . . especially after I lose!) and my confidence also increased. I also entered the 2nd Scottish Open and another Premier section in order to qualify for consecutive Candidates Here are some tournaments. games from 1989/90. Firstly revenge against Dave Gibb, then a game with Ian Aird who has gone on to become a very good player rated 2300+ and playing for his country, and, last but not least, a game from the Premier with R. Montgomery.

The English opening was very popular at this time because the OTB World Champion was using it on a regular basis - these trends also affect CC.

13 B b8!

For many years this move was my baby! I thought it was my own until I checked ChessBase before making the claim. I found a CC game Ludgate-Chandler in the British Championship 1987. I was very disappointed to learn I was not first to play this move. It is not just another move but the beginning of a whole strategy for Black in this line.

14 2a4

14 d3 was tried in the Ludgate-Chandler game and 14 &b2 was tried in another game I was playing at about the same time with Mark Thomas but after 14....c4 15 bxc4 &xb2 it was all over! Mark said he was playing the game in his head and simply got it all wrong. Are there more players who play like that? It must be one of the worst habits you can have in CC.

14 c4

Now Black's plan becomes clear. To break up White's position on the queen-side and dominate that side of the board. The usual response to a flank attack is a reaction in the centre but White's centre is weak!

15 bxc4

15 e4 &e6 16 營c2 cxb3 17 axb3 国xb3 18 營xc6 &d7 19 營c4 国b4 =+. 15 d3!? is worth a try 15.....cxb3 16 axb3 包e6 17 e4 &g6 18 &e3 包d4 (18 ... c5!? 19 包c3 營d7 20 包d5 &d6) 19 &xd4 營xd4 20 營c2 c5 21 国fc1 &e7 22 包xc5 国c8 23 国a5 (23 b4 營xb4 24 營b3 營xb3 25 包xb3 国xc1 26 昌xc1 空d7=+) 23 ... 点f7 24 堂c3 +=.

> 15 当d4 16 名c3

16 囟b2 直xb2 17 &xb2 增xb2 18 增a4 增b6 19 d3 包e6 20 直ab1 增c7 21 直b2 &d6 22 直fb1 包c5 23 增c2 0-0. Black does not dominate the queen-side but the position is difficult for White as a good plan is hard to find.

> 16 営xc4 17 営a4

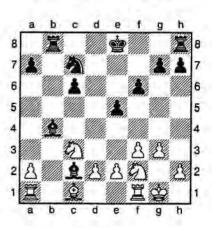

> 17 当xa4 18 名xa4 Ac2!

Restricting White's options.

19 ac3

19 名b2 名e6 (19 ... 名c5 is also good) 20 e3. Black has a few moves to choose from in this position! 20 ... 名b4 21 名c4 0-0 22 总a3 总xa3 23 名xa3 总g6 24 目fc1 c5 25 名c4 目f7 26 目c3 目fb7 27 目b3 目b4 and again Black has more than equality.

19 Ab4

20 acd1

This retreat may be White's best try! 20 f4 全d5 21 全fe4 全xc3 22 全xc3 e4 23 a3 全c5 24 空g2 空f7 (24 ... 总d4!?) 25 邑a2 总b3 26 邑a1 总d4 with advantage to Black. 20 a3 (A) 20 ... 总xc3 21 dxc3 邑b3 22 邑a2 总g6 (22 ... 邑xc3? 23 邑b2 threatening 总d2) (B) 20 ... 总c5 21 邑a2 总b3 22 邑a1 0-0 23 e3 邑b6 24 全fe4 总e7 25 d4 全d5 26 邑b1 邑fb8 27 dxe5 fxe5 =+.

20 ae6

Again there are other good moves for Black but 21 ... 요e6 is the most aggressive.

21 e3

21 월e3 ♣g6 22 a3 ♣c5 23 d3 0-0 24 월c4 월d4 25 월a2 and now lines like these can be considered. 25 ... 월xf3 (25 ... 월xe2 26 월xe2 ♣xd3 27 월e4 ♣xe4 28 fxe4) 26 exf3 ♣xd3 27 월d2 ♣xf1 28 월xf1, or 21 월g2 0-0 22 e4 ♣c5 23 월e3 월d4=+. There are too many weak squares in the white centre.

21 0-0 22 a3 \$\Delta a5

22 ... &c5 23 全c3 目fd8 is also good for Black.

23 昌a2 点b3 24 昌b2 昌fd8

The backward pawn on d2 becomes a target. 24..... 且 b7 is also playable, a plausible line is 25 d3 且fb8 26 全e4 显c7 27 f4 exf4 28 exf4 f5 29 全d2 & b6 -+.

25 2e4

> 25 f5 26 2ec3 2c5!

Leading to the win of material.

31 &c1 2xc3 32 &b2 2e2+ 33 2g2 e4 34 fxe4 fxe4 35 2xe4?

More resistance would have been offered by 35 萬e1 萬d2 36 &e5 &c2 37 堂f1 &d3 38 包xd3 exd3 39 萬b1 堂f7 40 萬b7 堂e6 41 &xg7 萬c2 42 堂e1 包g1 43 萬b2 包f3 44 堂d1 萬xb2 45 bxb2 堂d5 46 h3 堂e4 and black has control of the ending.

ď

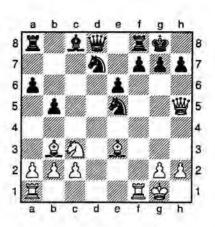

I qualified for the SCCA Championship for four successive years and entered every time. My best result was achieved at the first attempt when I came in third with 5/8 behind Tom Craig 5½/8 and the winner Nick Down 7/8.

I will give memorable games (including a couple because they were gruesome defeats!) from each year I played.

Next Issue

The summer issue of the magazine is due to be published in August. We would welcome articles/news from readers.

Contributions should be sent to the Editor by Monday 5^{th} July.

Or why not send a game or two to Bernard for his column?

Results sent to Controllers before that date will be included in the next edition.

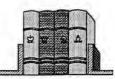

Articles/games can be sent in any form, but it would be extremely helpful if they were word processed (or sent in ChessBase format).

Material can be sent by email to:

AlanBorwell@compuserve.com

NEW BOOKS

reviewed by Alan Borwell

BATSFORD

Chess Under the Microscope by Paul Motwani 256 pages, £15.99

Another of the Scottish GM's witty series of books but (thankfully!?) not too saturated with acronyms this time. Certainly, Paul's way of writing is individualistic and refreshing. Here he delves into the treasure troves of chess secrets, providing instructive commentary and insight. Plenty of brain-teasers and interesting anecdotes to retain the reader's attention!

The Power Chess Program by Nigel Davies 255 pages, £16.99

The claim to be a "unique training course to improve your chess" is a very ambitious title. Containing 12 chapters and 48 lessons, it takes students through the essential elements of chess strategy, setting test positions for the reader to solve. Having made its 'unique' claim, it is rather surprising that many well-known games and positions are used. Really aimed at average club players, it seems rather over-priced (especially when compared with the previous title).

Winning Pawn Structures by Alexander Baburin 256 pages, £15.99

One of my favourite books of all time was "Pawn Power in Chess" by Kmoch. This new modern guide to pawn structures and their understanding is very welcome! It discusses the pros and cons of isolated central pawns, the use of rapid h-pawn advances, transferring the pawn skeleton, etc.

Well written and instructive.

The Complete Najdorf: Modern Lines

by John Nunn & Joe Gallagher 336 pages, £18.99

When this arrived, I first thought it was a 'complete' Najdorf book, but then I discovered that it did not include 6 Bg5 lines (covered in the 1996 book, but now rather out of date).

However, putting aside that disappointment, this is another valuable update of theory on all the other popular variations with 6 Be2, 6 Be3, 6 Bc4 and 6 f4 plus some unusual lines.

It is a rewrite of the earlier 1988 book, "Najdorf for the Tournament Player" but it contains much new material and ideas for Najdorf addicts

Victory in the Opening by Gary Lane 144 pages, £10.99

Using some 120 examples of short and violent games, this popular author demonstrates the "art of winning quickly in chess" (rather than how to lose that way!)

However, there is some good advice on how to avoid the pitfalls of opening disasters and how to punish premature attacks. It does contain interesting ideas for taking CC games into uncharted territory where tactical and creative ideas abound.

The Ultimate King's Indian Attack by Angus Dunnington 176 pages, £14.99

This is an updated version of the IM author's 1993 book on one of his specialist openings. Contains 50 well annotated instructive games involving most black formations - heavily favouring White!

EVERYMAN

CHESS

In January it was announced that Cadogan Chess would change its name to Everyman Chess (having been owned by Everyman Publishers plc for four years). of the Some following bear "Cadogan" imprints but, along with all previous titles, will be available under the Everyman banner. The book N.C.O. has been published jointly with GAMBIT - all very complicated!!

Nunn's Chess Openings by Nunn, Burgess, Emms & Gallagher 544 pages, £19.99

Described, with some justification, as the new chess player's bible, this massive and impressive tome covers all chess openings in detail. Up-to-date and very well presented in MCO/BCO style layout, it should prove to be an invaluable reference book for all CC players. Personally. I prefer a vertical rather than horizontal listing of moves and cross-referencing to Informant (ECO) codes would have been useful (although perhaps rather difficult to achieve with this kind of layout).

However, the publishers and authors are to be congratulated on their endeavours in producing such a fine book, at a comparatively reasonable price.

A Killer Opening Repertoire by Aaron Summerscale 144 pages, £13.99

Openings suggested are the Barry Attack, the 150 Attack, the Colle System, Classical Queen's Indian, Anti-Benoni, Anti-Dutch, etc. as a white repertoire starting with 1 d4. If you want to find out more, you will need to buy the book!

EVERYMAN CHESS Contd

Art of Attack in Chess by Vladimir Vuković 352 pages, £16.99

This is an updated algebraic version of the original, published in 1965. The indefatigable John Nunn has edited this book and has added 'analytical footnotes,' although not fundamentally contradicting the author's analysis.

There are chapters relating to attacking castled and uncastled kings, mating patterns, use of ranks, files and diagonals in attacks, penetrating fianchettoed and pawn barricades, etc.

A useful book.

Easy Guide to the Queen's Gambit Accepted by Graeme Buckley 125 pages, £12.99

Another 'Easy Guide' really designed for OTB players wishing to gain a basic understanding of an opening. Not really sufficiently comprehensive for advanced CC players, especially as the QGA does not have as great a success rate in CC as in OTB chess.

Chess Combinations: The Improving Player's Puzzle Book by John Walker 128 pages, £10.99

288 tactical positions, based on various themes, to test your solving powers!

Most Instructive Games of the Young Grandmasters by Paul Motwani 176 pages, £14.99

An excellent selection of the finest games of 13 of the brightest young GMs of the 1990s.

Paul, who himself won the World Under-17 Championship in 1978, is well qualified to introduce the players, which he does in inimitable style.

Also contains his usual assortment of tests and puzzles,

GAMBIT

Publications Ltd

Secrets of Modern Chess Strategy: Advances since Nimzowitsch by John Watson 272 pages, £19,99

Seventy years after one of the classics of all time was written by Nimzowitsch, we now have an 'advance' on My System.

The first part of the book covers refinement of the great man's classical themes.

In the second part, John Watson introduces new and modern concepts, such as Prophylaxis, Dynamism and Provocation, and the importance of time and information, etc.

A very interesting book.

Guide to the Benko Gambit by Steffen Pedersen 176 pages, £14.99

Another excellent book by this young Danish IM covering one of the most modern and dynamic of chess openings.

For correspondence chess players, the Benko offers black opportunities to take the game into tactical and unbalanced directions.

This book, coupled with recent innovations from GM play, will provide Black with a formidable weapon.

Understanding the Grünfeld by Jonathan Rowson 240 pages, £15.99

This is the first major book written by Scotland's newest young and talented IM, and a good one!

Written in entertaining style, Jonathan covers the complexities of this famous and popular opening with great vigour and enthusiasm. With chapter headings such as "Dealing with Delroy", "Random Monkeys", "A Pint of Carlsberg", etc., it leads an inquisitive reader into the mysteries of his writing.

Recommended for CC players.

The System : A World Champion's Approach to Chess by Hans Berliner 176 pages, £14,99

The first of two excellent books about correspondence chess World Champions - very welcome - well done Gambit, keep up the good work!

Hans Berliner, the 5th World CC Champion, provides a fascinating insight into his "Approach to Chess". He explains the set of principles which he adopted to guide him to the selection of the right moves.

Like fellow countryman, Bobby Fischer, the games of Berliner appear to be very logical and relatively simple, but the beauty lies within. His selection of openings, overview of the entire board, avoidance of speculative variations and, above all, his artistic creativity, come shining through in this book.

Like other World Champions, Hans Berliner has a tendency to be dogmatic about chess, but his record of 94 wins, 10 draws and only 1 loss at CC, made him an awesome opponent before a rather early retirement from CC tournament play. Recommended.

World Champion at the Third Attempt by Grigory Sanakoev 256 pages, £15.99

This is an English edition of the original Russian and later German versions of an excellent book.

It contains the story of Sanakoev's quest to become World Correspondence Chess Champion, succeeding at his third attempt.

His selection of 59 superb CC games displays all of the qualities required from a World CC Champion. He has a very creative style of play, based on sound principles, with many superb attacking masterpieces.

It is very instructive to see a World Champion's choice of opening variations, to try to understand the early middlegame tactics and then how he ruthlessly converts his advantages.

For correspondence chess players, there is a great deal which could be learned from this excellent book.

ChessBase 7 (Part 2)

[by Bernard Milligan]

My first article on ChessBase 7 seems to have been well received and I have decided to write a further article, which may develop into a series depending on our reader's wishes.

This time round I intend to take a closer look at Databases and their usefulness to correspondence players. I hope you all read John Mackie's letter in Magazine 64. John is perfectly correct when he points out that many databases contain inferior games by inferior players, and that many of these games contain blunders. This is particularly true with an ever-increasing number of cheap databases appearing on the market.

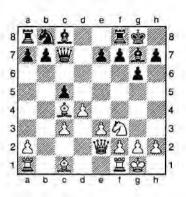

This is not to say that games by weaker players may not be useful but it does mean that the correspondence player will have to pay far greater attention when evaluating the strength of any particular move. I wouldn't consider myself to be even a moderate player, yet some of my games have appeared in the analysis of books by top players. Indeed even weak players can on occasion find moves and lines, which are well worth considering.

One way to cut out the weaker games is only to buy high quality databases such as ChessBase's Mega Database '99, but these are costly and retail in the UK at around £185. This sounds a lot but Mega Database '99 contains 1.1 million games and approximately 30,000 of these games are annotated. Looking only at the annotated games if we guess that the average book contains 500 annotated games then that is equivalent to 60 books. If the average book costs £14.99 then that would work out at £899.40's worth of books. Perhaps Mega Database isn't quite so expensive when viewed in those terms.

Anyway onto the main point of the article and a basic look at the use of databases. Compared to a book, which will follow an annotated game with the occasional game thrown in, a database is capable of finding perhaps several hundred games from a given position. This is particularly true at the start of the game. The book annotator from the same position may give several lines of analysis but these will generally only concentrate on the candidate moves which the author considers relevant. The database simply identifies all the games where that position has been reached.

The following moves were played in a game in the SCCA Championship a few years ago.

1d4 월f6 2 c4 g6 3 월c3 d5 4 월f3 گg7 5 e3 0-0 6 cxd5 월xd5 7 &c4 월xc3 8 bxc3 c5 9 0-0 쌀c7 10 쌀e2.

A fairly standard position has been reached but I will use the Opening Report in ChessBase 7 and Mega Database '99 to see what sort of information I can gain after White's 5th, 6th, 7th, 8th, 9th and 10th moves. Looking only at the recommended main replies for Black and the statistical information produced, the following was found:-

- 5...0-0 Black scores above average (50%) 1564 games.
- 5...c6 Black scores below average (41%) 37 games.
- 5...e6 Black scores well (55%) 10 games.
- 5...c5 Black scores below average (41%) 23 games.
- 5... \$\Delta f5\$ Black scores excellently (67%) 3 games.
- 5... 2 c6 Black scores badly (33%) 3 games.
- 5...h6 Black scores excellently (67%) 3 games.
- 5... 2g4 Black scores averagely (47%) 7 games.
- 6... 包xd5 Black scores above average (52%) 264 games.
- 7... 全xc3 Black scores above average (50%) 134 games.
- 7... 2b6 Black scores above average (50%) 122 games.
- 7...c6 Black scores above average (50%) 3 games.
- 8...c5 Black scores above average (50%)
 126 games.
- 8...b6 Black scores excellently (70%) 5 games.
- 8... 2c6 Black scores miserably (20%) 5 games.
- 9... " xc7 Black scores well (55%) 18 games.
- 9... 2c6 Black scores averagely (47%) 41 games.
- 9...cxd4 Black scores below average (37%) 4 games.
- 10... ≜g4 Black scores above average (50%) 18 games.
- 10... 2c6 Black scores below average (47%) 18 games.
- 10...b6 Black scores excellently (68%) 14 games.
- 10... 2d7 Black scores well (62%) 5 games.

Clearly the first thing to note is that this is statistical information based on the games found in the database. The information produced can therefore only be as good as the information contained in the database. It may well be that all the games found on a particular line have produced good results for one side or the other but that does not necessarily mean that.

GAMES SECTION

Selected by GAMES EDITOR Bernard Milligan, 15 Bothwell Court, Hawick. TD9 7EP.

I always enjoyed and appreciated the games column produced by my predecessors so I was delighted to get a chance to continue their good work. Until this issue I don't think I truly appreciated how frustrating their job may have been in the past.

Alan and Moira Borwell put a great deal of effort into producing the magazine and have to set deadlines for us lesser mortals to get our work done by. With a week to go for my deadline for this magazine I had a heavy dose of the flu. No I'm not looking for sympathy but what was far worse was that since the last magazine only two games had been sent in for this column. Come on, you guys and gals (OOPS, sounds like a serious age problem setting in. I can't believe I have picked up that phrase from Jimmy Saville.) Give me a break, surely you can take pity on me and try harder to send in a few more than that

I did manage to get a few more contributors so you can relax and enjoy a fair selection of thoroughly enjoyable games fittingly kicking off with joint 1997/98 SCCA Champion Jonathan Lennox.

I am playing Jonathan at the moment and he was kind enough to send me a photo of himself perched on top of a mount Stok Kangn (6121m) in Ladakh in 1992.. Doesn't it make you sick when your opponent is super-fit as well as clever.

That gave me a nice idea. Why not send me photos of yourselves for the magazine. Players always wonder what their opponents look like so this would be the ideal chance to let them know. All photos welcome but no body doubles allowed.

ICCF World Cup XI, 1999

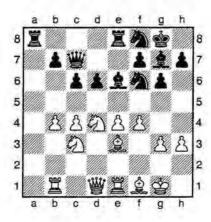

White C J Lennox Black H Onoda

Kings Indian Defence [E69]

[Annotator - C J Lennox]

This game is certainly not typical of my style of play, but Richard Beecham had shown me (see SCC 59) the vulnerability of Japanese players to all-out attack.

1	2 f3	216
2	c4	g6

	1	0

Black finally resigned in view of 36 ... 営d2+ 37 章e2 章xe2+ 38 含xe2 營xe2+ 39 含h1. The 含g5 plays a crucial role in both attack and defence, despite having been en prise since move 28!

[BM: The threat was smothered mate with 29 발g8+ 요xg8 30 요f7. You really have to keep an eye on these champions as they can come up with all sorts of nasty tricks!]

유유유유

The 1997/98 SCCA Championship was a pretty hard fought competition. After 18 gruelling months of play, Jonathan had ended with 8 points from 12 games alongside SCCA Vice President lain Mackintosh with an identical score. And both players were declared joint Champions. In the spirit of fair play I therefore decided that our second game should come from lain.

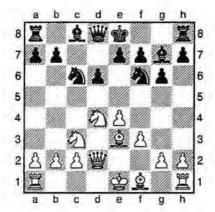

SCCA Championship 1998
White I. Mackintosh

保사무사

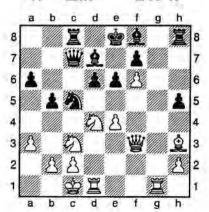

Tom Thomson is proving to be an ever improving player and an asset to the SCCA, particularly on the international scene. I am not really a betting man but I can see Tom as a potential correspondence GM. His following game is a delight. I had all his notes in front of me yet still found it difficult to keep up with him. Guess that's another game I will lose in the Championship. Does anyone know of any cheap hitmen?!!

The following two French Defence games were kindly provided by Robert Beacon who has proved to be a very tenacious player over the years.

Unfortunately for his opponents Robert's memory of how to play the game is far better than his memory of when the games were played.

Major 199?

White R. Simpson Black R. Beacon

French Defence [C00]

[Annotator - R Beacon]

1	e4	e6
2	d3	d5
3	Nd2	e5

A move designed to take advantage of White's passive opening.

4 exd5

After this exchange it is difficult for White to "harass" the Queen on d5. More prudent would be 4 월gf3 월c6 5 c3 월f6.

4 營xd5

Interesting is 4 ... c6 5 dxc6 axc6 with an improved version of the Scandinavian Gambit 1 e4 d5 2 exd5 c6 3 dxc6 axc6 4 ab5! (the "refutation").

5 当e2 包c6 6 包gf3 f5

Better would be 6 ... 294.

7 c3 2f6 8 2b3

8 2c4!?

This is too passive. 9 d4 or 9 c4 would be more promising.

9		0-0
10	2 c4	f4
11	d4	exd4
12	2xd4	2xd4
13	cxd4	&b4+
14	₫d2	⊒e8
15	2e5	世xd4

15 ... Ac5 is even better!

16	些c4+	世xc4
17	Axc4+	∆e6
18	Axe6+	

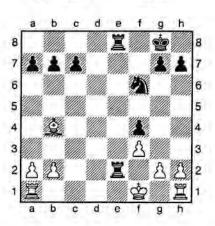

18 0-0-0!? is an improvement.

18	****	E xe6
19	&xb4	≅ xe5+
20	C 54	

Obviously Queenside castling would have prevented this move which "under-develops" White's game.

21 Be1 had to be played.

21 Be2

22	Ac3	⊉ d5
23	&d4	₫ d2
24	∆xa7	b6
25	h3	⊉e3+
26	⊈e1	国xb2

Fritz 5.32 is Blind!

[Letter from John Mackie, Australia]

Dear Friends,

Just to let you know that another bug (rubella virus?) has been found in Fritz 5.32. The program is "blind" and does not see one move winning stroke in the position below arising from a Sicilian variation:-

1 e4 c5 2 包c3 包c6 3 包f3 d6 4 d4 cxd4 5 包xd4 包f6 6 息g5 e6 7 營d2 息e7 8 0-0-0 包xd4 9 營xd4 0-0 10 f4 營a5 11 急c4 急d7 12 e5 dxe5 13 fxe5 急xc6 14 息d2 急c5 15 營h4 包d7 16 邑he1 營c7 17 包e4 邑fd8? 18 急g5 邑db8 . . . and here Fritz 5.32 persists in playing 19 包xc5, not seeing the thematic 19 邑xd7! 急xd7 20 负d3, 1:0.

But never fear, expensive upgrade will soon be here!

The "Fritz is Blind" position actually occurred in one of my games in IECG (experimental at this stage) and I was on the receiving end. When I submitted the position to F5.32 it came up with the rubbish move, although I must admit that I did not see 1 🖺 xd7 myself (I did not bother to analyse the position - this is not an excuse!)

I want to expose the futility of using electronic chess aid for EM/CC but there is nothing I can do to stop the practice. Some of my European colleagues have given up CC because of the computers, etc. They say that there is no point playing competitive chess against computers! They can do that at home!

If you have April 1999 issue of Inside Chess, there is an article on rook endgames by Baburin (pp 18/19).

Baburin demonstrates that 1 ... a4?? is a blunder. The position: White: 堂c1 &d5 Black: 堂a3 單b2 &a5. Baburin says that 1 ... 單b4 wins. Fritz 5.32 plays 1 ... a5??(!!) incredible. Genius 6 plays 1 ... 單f2 which is better than F5.32.

Bobby Fischer An Attempt at Analysis

[by Carlos Almarza-Mato]

The author wishes to dedicate this article to Scotland and all the members of the Scottish Correspondence Chess Association.

It has taken me over eight years to realise the importance and contribution made to chess by Bobby Fischer. It has taken me over four months to write it. This is not "the definite article about Fischer" and the only aim I pursue is that of making the reader start thinking by him/herself simply attempting to offer him/her what I would like to be a new light or a different reference point to look at the matter from.

Chess conforms a vast cultural empire and sometimes it is impossible to couch in words everything one has read or every conclusion one has reached, so falling in a sort of Wittgensteian paradox

Chess has its own goddess, known by the name of "Caissa". May Caissa illuminate all of us in our chess initiatic paths so as we will be able to understand, discern and learn. And for her, the only words I have, were written by William Blake:

"Never seek pain to tell thy love, Love that never told can be."

"What is now proved, was once only imagined." W. Blake

Introduction

Chess is a very complicated game. Any player whose aim is to become a strong player or whose goal is to devote himself to chess in a professional way or even any player who wanted to make his way in the field of postal chess is in fact entering the difficult realm of competitive sport. It does not matter if you want to tournaments or become correspondence chess GM. In both player cases, the needs systematical training. Training methods have been devised by professional trainers and any of us can find them in books, articles in chess magazines, etc. And in my humble opinion the first requisite one needs is that of an open mind. The player has to devote his time not only to memorise opening variations and the ideas expressed by the leading players of the moment. You need independent thought and the strength and capacity of discerning the many prejudices this world is full of.

One of the defects of many modern top players is that they have consciously forgotten the study of the classics. "Nobody plays like that now." This is too frequently said and far worse, I add. I have read interviews made by strong professional players who say they have never studied the games played by Fischer, Spassky. Botvinnik, let alone Capablanca or Alekhine. And this explains why they will never become World Champions, or even Candidates. Karpov or Spassky for instance. Karpov became what he has been thanks to the study of Capablanca, while Spassky's model was Alekhine. So, if the study of players who preceded them thirty or forty years in time helped them to become World Champions, how can it be said that today it is not necessary study Fischer, to Spassky or Botvinnik at the same that study you contemporary GMs? By accepting concepts like this, the player is simply hampering his development. An important part of the strength of a chessplayer is the knowledge of all those who have preceded him. In the study of the classics Will find the you development of the different strategical and tactical ideas which

are a part of the player's weaponry. Ideas have changed, new methods been discovered, approaches are used, but to know the exceptions you must know the rules first. It is very funny to see how many leading players say one thing but do a different one. games played by Steinitz, Alekhine, etc can be a source of inspiration to produce even opening surprises. Perhaps some of their ideas have been forgotten, but many others can become deadly weapons reassessed under the light of the new approaches in the field of With the present chess strategy. chess, the computers, etc. we must accept the earlier the better - that the more weapons we have, the success we can achieve. And ideas are not the patrimony of modernity. Anything which is useful, is useful, and has to be quickly integrated into our own set of concepts. It does not matter who produced it or when it was produced.

On the other hand, why do chessplayers have to study the games played by leading Grandmasters or World Champions? The answer is manifold. Firstly, we study those games because there we can learn both strategy and

tactics. Secondly, because we can learn openings and endgame technique. Thirdly, we study a certain chessplayer because we want to identify ourselves with that chessplayer and choose him as our model by some reason or another. For us, he is our "master." It happens in all branches of art and there are many psychological reasons involved.

Nevertheless, in my opinion, there is one more reason for the studious chessplayer: learning the METHOD. Learning "how" and "why" our admired player produces ideas. Of course, it implies the previous knowledge of strategy, tactics, some endgame technique, etc. We want to learn his TECHNIQUE when playing chess: how he applies the laws or exceptions of strategy, how he attacks or defends, how he plays the transition between the opening middlegame, the middlegame and the endgame, the meaning of all his moves in the game, why he played this and not that. In short, we want to clearly appreciate his PROCESS OF THINKING.

To carry out all this we have to study the player's chess approach, the sort of positions he likes, how he reaches them, how he tries to interfere with the opponent's plans. So every game has to be played several times trying to understand what is behind every move. If the game is annotated, we can use the notes as a guide, although we will have to do a move-by-move job on the game. In this consists the study of chess games: the attempt to METHOD, apprehend the by dissecting the games. For chess is manifestation the vivid THOUGHT.

(I would like this article or parts of it to be useful or at least act as a sort of eye-opener for the reader to pursue his/her own way. Answers only appear after questions have been made, so making explicit what previously had been only implicit.) Max Euwe: "Fischer thinks in systems, not moves. With him it is not good enough to say that a player has made a good move. You must know the system he is playing and what fits into the system."

Fischer. "You have to force moves and take chances."

Fischer. "Ideas, I never memorise moves."

Fischer. "They commit mistakes."

Fischer's Chess Style Features

- Unrelenting maintenance of tension.
- Active play in the opening, middlegame and endgame.
- Concrete thinking: calculable positions.
- ♦ Fluid piece play.
- ♦ Tactical handling of the defence.
- Concrete handling of the strategy.
- Disciplined imagination.
- Highly developed abilities for calculation of variations.
- Alertness to combinational and positional intermingled features in every position.
- Use of radical methods to reduce his opponent's counterplay.
- Straightforwardness.
- Master in the art of switching advantages.
- Master in the art of playing on empty squares always pursuing space to manoeuvre.
- Disagreement with speculative chess.
- Risk and danger are calculated to the utmost, never speculating.
- Play "move-by-move" or "blowby-blow".
- ◊ Technical perfection.
- Influences: Morphy, Steinitz and Capablanca.
- Mastering of the twofold process of calculating variations and the formation of abstract concepts
- Incredible insight for finding intermediate moves in both the calculation of variations and in combinational melées.

First Approach

Fischer's main weapon is that of his overwhelming ability to calculate variations, having a deep insight to

find intermediate moves in the most complicated of positions. "clarity" of his play claimed by some critics and the Soviet players is only a delusion. His play is far from clear. The aspect of simplicity hides, in fact, very dangerous elements. He is able to reduce a complicated strategy to a series of blows filled with tactical venom. He often seems to be tottering on the abyss, but in fact he is seeing everything and his moves which are but the exponents of his strategical depth have only one aim: destruction of the opponent on the Fischer board. subordinates everything to the system he is playing no matter how weird or odd the moves may seem. He is always assessing concrete features, paying great attention to the tactical nature of moves.

Fischer's opponents are confronted by a player who is always ready to embrace danger, always using all resorts, fighting till the last chance. always turning the board into a mine field. It is not enough to have a good plan. It is necessary to find the best move time after time, being aware of all the possible variations sub-variations. always calculating, always assessing the position from a concrete point of view. In his game, there is no room for waiting moves, there is no way for seeing what the opponent's plans are. Fischer imposes his own tempo posing new threats with each move. He has mastered the difficult art of enchaining attack after attack, being able to switch from one target to another by means of tactical and combinational threats. The rival has either to accept it or fall into strategically lost positions, so allowing Fischer to impose his superiority this time by positional means.

Fischer's Opening Systems

The openings a chessplayer uses are the first clue to understanding his approach to chess, since the opening and the variation or subvariation he chooses lead to the sort of positions he likes best. Of course, his rival will also try to impose his own mark on the game and so we have the subtle fight which characterises the struggle for the predominance in the opening.

As Black, his preferences are clear:

Against 1 e4, the Sicilian Najdorf (He has played the Alekhine 1 e4 2 f6 in a few games and even 1 e4 e5, but only in three-four games throughout his chess career.)

Against 1 d4 / 1 c4 etc, he has played mainly the King's Indian or other similar systems characterised by the King's Bishop fianchetto. In the early sixties, he played systems involving ... 2f6 / ... e6 (Nimzo-Indian, Tarrasch, Ragozin) but this was a transition period. Apart from the King's Indian, the Grünfeld Defence was also one of his favourite openings and prior to the Rejkjavik match he had used it in very important encounters.

Fischer's aims as Black are clear: quick equalization, fluid piece play, counter-attack and the provocation of tactical clashes as soon as possible.

Being primarily a positional player, Fischer was able to infuse tactical poison into well-known, time-honoured positional systems. This versatility allowed him to be ready for long, protracted positional struggles or for quick tactical skirmishes, becoming a formidable opponent.

In my opinion, the Russians totally failed to appreciate all this and laboured under the delusion of believing that Fischer's style was "crystal clear", "easy to predict," "easy to meet" etc. They believed that an individual fighting alone would not be able to oppose any resistance against the enormous Soviet chess machinery. delusive concept was helped by the fact that prior to 1972 some Russian players had posed many problems to Fischer (for instance Keres, Tal, Geller and the very Spassky himself). Perhaps they forgot that a loner like Fischer, who had chess as his vital obsession and the only way to affirm himself before the world. had been learning from his defeats at Russian hands, and that his selfcriticism. well 25 as psychological insight concerning the Russian players - his main enemies - were giving him a clear picture of

what loomed ahead, while the Russians were resting on their laurels, forgetting that past feats do not earn present points in chess matches, and that chess is a game in which two players have to meet, with their virtues, yes, but also being liable to show all their defects. Spassky's sin and the Russian's sin concerning 1972 has two names: "over-confidence" and "under-estimation." Against a sniper like Fischer, all that proved fatal.

As White:

Here the matter is even clearer: with the exception of his early beginnings, Fischer has only played 1 e4. He simply spoke of this move as "best by test", never engaging in other philosophical discussions. In his early years he started playing the King's Indian Attack and he also played 1 b3 in some off-hand games, even though one of these games was against Tukmakov in a decisive tournament.

As he can be considered a classical chessplayer, it is normal that his main weapon is the Ruy Lopez. From time to time, he has also used the King's Gambit and the Italian Opening, choosing in these two cases variations not normally employed but that Fischer had studied in depth due to his love for players like Steinitz.

One of the recurrent themes in Fischer's games as White is that of the centre without pawns. In many of his games, variations in which the central pawns are exchanged are common. It is very instructive to study how Fischer plays these positions, in which the fight revolves around piece play only.

Let's take, for instance, the Breyer Variation in the Ruy Lopez. Fischer consistently used the Simagin system, which implies the exchange of pawns in the centre, opening lines. Later, Karpov patronised the variation with the move d5 closing the centre, giving predominance to flank manoeuvres which involve a lot of "fending" strategies. Of course, Fischer knew all this too, but he simply preferred more direct methods where he could use his

extreme ability to provoke fluid piece play so as to conjure threats apparently out of thin air, but in fact based upon well-established strategical basis.

The opening is connected with the middlegame and all World Champions have managed to master the transition between one and another. In this respect. Fischer likes producing muiltipotential positions where accurate calculation is required as the only way to understand and resolve the different positions. Thus, the opponent is confronted with the problem of choosing among a wealth of possible variations, all leading to end positions difficult to evaluate, and the paths to those end positions are also full of intermediate moves. His aura of invincibility was so overwhelming that an American GM declared that it does not matter which type of position you may have, because against Fischer you "know" you are going to lose . . .

Fischer's style shows a two-fold feature: on the one hand a deep purity based upon the application of the time-honoured principles, and on the other hand, the display of tactical blows in which every move both belongs to the system and also conforms the very system he is developing. His primary approach to the positions is scientific: he knows the openings and the sort of strategical plans involved. Then he looks for the best of plans and the most destructive moves to carry it out, trying to prevent any tactical struggle. When he has to resort to defence, his stubbornness admirable: he will use all sorts of tactical resources to complicate the game, to compel his rival to choose and take risks because here lies the possibility of committing mistakes or inaccuracies. The games where Fischer had to show his defensive skills are worth a deep study. Both in attack and defence, he is ready to embrace danger to the utmost if he sees that he can calculate the risk or if he feels that the position may become so wild that he will be able to impose his refined calculation technique, seeing farther than his

rival or what is more important, perceiving all the nuances which compose a forest of intermediate moves.

Due to Fischer's approach to chess which clearly manifests itself in his opening repertoire, he tended to reach what Kotov has defined as "resolvable positions." Nevertheless, I do not totally agree with Kotov's classification of them, and so in my opinion resolvable positions are three-fold:

- Positions resolvable by logical plans and precedents.
- Positions resolvable by calculation.
- Positions resolvable by the method of playing move-bymove or blow-by-blow.

(It must be understood that it is the player himself who, knowing his style and approach, decides the sort of positions he wants to reach. Then he will choose those openings which lead to the type of positions he prefers. Of course, in the process there will be a fight between him and his opponent, who will also try to steer the game into the sort of path of his liking.)

Fischer has nearly always avoided speculative positions because the thing he has most feared is that of taking risks which cannot be TOTALLY controlled by him through straightforward calculation. And this is another key point to understand his style. Strategically speaking, he is a classical player, influenced by strategists like Steinitz, Tarrasch, Capablanca. Tactically speaking, he possesses the directness of Morphy but with the killer instinct developed to the utmost.

Analysing Fischer's games and his combinations, one can see how every move has an aim. And this does not mean that his style is "clear" and "easy to predict" as his Russian counterparts believed, so being caught on the hop one after another (Taimanov, Petrossian and Spassky). Fischer's style, like the image on a mirror, is absolutely delusive, and its clarity is only apparent once you have seen the moves. And if you do not believe it,

take one of his games, cover his moves and try to guess them one by one.

In Fischer, there is no room for double-edge, wild positions where everything depends upon luck or speculation. Fischer does not play against an opponent as Lasker, Tal. He plays against perfection and this makes him totally averse to speculation. He wants to play a perfect game of chess, against perfect replies from his opponent. Perhaps, like Alekhine, he also suffered a lot because "it takes two to play a perfect game of chess and produce a masterpiece." It is not enough to win the game. It is necessary to produce a complete flawless game. Fischer mastered both the rules and the exceptions. extracting some of his ideas from the weird games by Steinitz. Sometimes he showed that some exceptions were, in fact, better than the accepted rules. He accepted that causes produce effects, but that - and here lies the paradox some effects also produce causes.

Important Explanation

In the game(s) which follow it will be normal to find the concept of "advantage." To understand a game of chess it is very important to realise how top players are able to obtain (an) advantage. In some cases it will mean, simply, to have the initiative, that is, to be the first in creating threats so making the opponent think only about defensive moves or plans.

"Advantage" can be obtained through different means, for instance:-

- Mistakes committed by the opponent which allow one to obtain a strategically predominant position or tactical threats.
- Initiative: when the opponent commits a mistake, accepts a defensive or passive role, fails to create counterplay etc., and allows us to carry out our plans without any possibility to react with counter-threats.

- O Positional pressure: formation of deep strategical threats which the opponent does not appreciate, fails to assess properly or is not able to stop due to having structural weaknesses.
- In the tug-of-war of a game of chess, one of the players may accept certain weaknesses in exchange for what he assesses "compensation." theless. the opponent may manage to keep the game under control avoiding creating himself weaknesses in his own position. and after a liquidation of pieces he succeeds in cashing in on the rival's weak spots (one of Fischer's main weapon and one often neglected when annotating his games, which are more than dazzling tactical fireworks).

Advantages are switched during the development of the game (positional transformations, initiative etc) and this implies a high degree of technique and a high degree of talent and imagination.

In the following pages (and in future serialisations) games are analysed. But chess is inexhaustible and the reader may find many other details through the application of his/her own knowledge and experience. This is what all this is about. There are no absolute truths here, only hints. Instead of "teaching", it is better to show how to learn and investigate by oneself.

Western Open Championship 1963 Hans Berliner - Bobby Fischer

This game was regarded by Fischer as one of the games which most accurately showed his chess style (unable as he was to clearly define it). The main features of the game are:-

- Active play to reach a multipotential position.
- Avoidance of tactically unclear melées
- Timely counter-attack transforming a static initiative (superior piece placement) into an advantage.
- Creation of continual threats.

Liquidation into a superior endgame: creation of threats to majority in the Queenside (another example of the switching of advantages). In this respect, Botvinnik was a real master too in the art of smoothly liquidating middlegame positions into superior endgames, perhaps influence to the Capablanca's games.

1 d4 2 f6 2 c4 e6 3 2 c3 d5 4 cxd5 2 xd5 5 e4 2 xc3 6 bxc3 c5

Immediately after White has created a strong pawn centre Black proceeds to attack it. The ensuing position is one with a mobile pawn structuring.

7 包f3 cxd4 8 cxd4 &b4+ 9 &d2 &xd2+ 10 營xd2 0-0 11 &d3 b6 12 0-0 &b7 (exerting pressure on the centre) 13 單fd1 全c6 14 營b2

Another plan would be 14 d5 exd5 15 exd5 since 15 ... \subset \subset xd5?? would lose to 16 \subset xh7. Berliner prefers to maintain the tension.

14 ... 当f6

Never allowing his pieces to interfere with each other. The text attacks the pawns, pins the d-pawn, makes room for the rooks, covers the king-side and places the Queen pointing at White's King.

15 Bac1 Bfd8 16 요b5 Bac8 17 일e5?!

It would have been better to maintain the tension. White wants to fix the central position in search of active play and entry points for his heavy pieces. Fischer has seen farther.

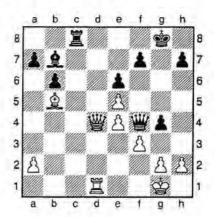

Positional theme: the Queen in an advanced position.

19 日xc8 日xc8 20 世d4 g5!!

Typical of Fischer. Apart from the fact that 20 ... 營xe4 is losing due to back-rank mate, the concept is very deep indeed, starting a sort of preemptive attack.

21 f3 (21 世d7 耳f2) 21 ... g4!!

White's plan started with 全d5 has failed. Fischer manages to create counter-threats with a minimum of forces. 21 ... 且e5 gives nothing in view of variations like 22 总e8 且c1 23 总行 位行 24 型d7.

Is this move good or bad? There is no agreement. Analysts like Smyslov, Tukmakov, Yudasin and Tal say nothing about it. But others say this is "?" and give 22 ... 當 c2 20 g3 營h6 24 營d3 甚xa2 25 fxg4 營g7 26 營f3 營g6 27 总d3 邑a4 when black pieces display enormous activity.

23 gxf3

Another move without agreement. While 23 &f3!? was suggested, others believe that 23 &xf3? 堂g7 24 堂d7 營e3 25 堂h1 邑c1 is good for Black.

23 ... \$h8

23 ... 且c2 is bad: 24 增h1 且xe2 25 且g1.

24 ≌h1 &a6!

White's bishop defends his pawns. Without it the structural weaknesses are emphasised. If 25 Axa6?? 世xf3 wins. Fischer manages, through the tactical creation of threats which must be clearly anticipated and worked out by his opponents, to obtain a superior endgame. It is this process of shifting from position to position using tactical means (creation of threats), which is the key point to understand Fischer's chess style.

Here, once his rival committed himself to a certain plan (17 2e5), Fischer started to create threats in an apparently fixed (static) position (with ... g5-g4). This is dynamic strategy at its best. The rest is to eliminate the defensive pieces so as to impose his superiority, a device much to Capablanca's liking.

25 增f2 点xe2 26 增xe2 增xe5 -+ 27 富g1 f5 28 增d3 (28 增g2 fxe4 29 fxe4 b5 28 昌e1 f4 29 昌g1 昌g8 30 昌g8 增g8) 28 ... fxe4 29 fxe4 (the threat is always 昌c2) 29 ... 岛f8

Fischer is trying to down his rival with piece play. But in cases like this, it is necessary for the opening of a second front. Here this second source of threats is the queen-side majority.

30 世c2 世f6 31 昌g2 世d4 (31 ... b5) 32 h3 世a1+ 33 邑g1 世e5 34 世g2 b5! (the second front) 35 世c2 b4 36 世g2 a5 37 世c2 世f6 (the plan now will be to force the change of Queens to impose his pawns) 38 쌀c4 (38 쌀g2 a4) 38 ... 쌀f3+ 39 堂h2 昌d8 40 堂c2 堂c3 41 增xc3+ (41 国q2 增c2 42 国c2 a4) 41 ... bxc3 42 且c1 且d3! 43 且b1 할g7! 44 Bb5 (44 Bb7 할f6 45 월h7 월e5 -+) 44 ... a4 45 월c5 a3 46 堂g2 昌e3! 47 昌c4 堂f6 48 h4 호e5 49 호f2 Bh3 (threatening 50 ... c2 due to the threat Bh2 if 51 且xc2) 50 曾g2 自d3 51 h5 曾f4 52 h6 堂e3 53 昌c7 堂d2, 54 且xh7 c2 55 目 c7 c1=世, White resigns.

An impressive game.

[Editor: Normally, we only publish games and articles focused on correspondence players. chess and CC However, our good friend Carlos has produced this superb insight into chess generally, using examples from the games of the unique Bobby Fischer. This is the first part of his study, serialised which will be 1999 the in editions of the SCCA Magazine.]

If you've enjoyed playing international opponents in friendly matches, then why not try an ICCF event? Details are given in the blue entry form which is enclosed with this magazine.

ICCF THEMATIC TOURNAMENTS

Sections of 5-7 players, two games against each opponent. Top two players qualify for each Final.

Entries by 1/6/99, start 15/8/99

9. Nimzowitsch Defence, B00 1 e4 Nc6

Entries by 1/8/99, start 1/10/99

10 Caro Kann, Knight Defence, B15 1 e4 c6 2 d4 d5 3 Nc3 dxe4 4 Nxe4 Nf6

11 Larsen Opening, A01 1 b3

Entries by 15/9/99, start 15/11/99

12 From Gambit, A02

1 f4 e5 2 fxe5 d6 3 exd6 Bxd6 4 Nf3

13 King's Indian, Sämisch Variation, E80 1 d4 Nf6 2 c4 g6 3 Nc3 Bg7 4 e4 d6 5 f3

Entry Fee is £6 per group (payable to Scottish CCA) to :-

Mr. George D. Pyrich, 13 Ardgartan Court,

Balfarg,

Glenrothes,

Fife, KY7 6XB.

ICCF INDIVIDUAL TOURNAMENTS

(by George Pyrich)

Another fairly quiet period with only 8 new entries (numbers 1 to 8 below) since the New Year. Also listed are those unallocated from last year (Nos. 22, 25 & 27 to 30).

Play

However, there have been a sizeable number of final results, with some of our members enjoying notable successes!

SCOTTISH CHESS ASSOCIATION

... promoting chess throughout Scotland

Individual membership for one year costs only£23

Benefits

- Scottish Chess Magazine 6 issues per year
- SCA Website the information medium of the millennium

- Personalised current or previous year grading print-out free on request
- SCA chess calendar a comprehensive listing of tournaments around Scotland

* A new benefit for SCA members, the SCA Grand Prix which becomes effective from July 1st this year. This will be split into 4 grading sections of below 2150, 1900, 1650 and 1400, sponsored by Todd & Mitchell (Solicitors)

New memberships, renewals and enquiries - please contact Sam Collins, SCA Customer Services Director, PO Box 67, 15 Hope Street, Glasgow G2 6AQ, Tel/Fax (0141) 221-6464, Email: sca@btinternet.com

Chess Mail

Subscribe now to this outstanding international magazine for correspondence chess and Email players.

Edited by Tim Harding, this high quality monthly magazine contains up-to-date news of international CC tournaments, news, games and an excellent range of interesting articles from worldwide contributors.

It is obtainable from Chess Mail Ltd., 26 Coolamber Park, Dublin 16, Ireland, Email editor@chessmail.com or from Chess & Bridge Suppliers (Scotland).

Excellent value! £29 for 11 issues in 1999. (1998 back numbers available for £16.50)

Correspondence Chess World

Chess Mail CD

This initiative from Chess Mail contains 55,000 CC games in ChessBase and PGN formats, including those from many complete tournaments.

It has an A-Z of the leading CC players (over 300 with more than 200 with photographs). Information includes ICCF Rules, contacts, FAQs about CC and 12 back issues of Chess Mail etc.

Requires Windows and Web Browser. Adobe Acrobat Reader 3 is included on the CD along with other useful software for managing CC.

Price £26 (inclusive of postage)

From: Chess Mail Ltd., 26 Coolamber Park, Dublin 16,

Ireland, Email: editor@chessmail.com See reviews on http://www.chessmail.com
