by Alan Borwell

No. 66 Summer 1999

Well, summer did eventually arrive, although we had four successive cricket matches rained off on Saturdays in June! Due to a rearranged cricket cup tie at Strathpeffer, I was unable to be in the Borders on the same afternoon for the SCCA AGM - sadly, the first which I have missed since the Association was formed over 20 years ago!

However, the meeting seems to have been successful, although only 7 members/officials were able to attend (compared with 10 in 1998 and 13 in 1997) - 6 members are required for a quorum for AGMs. Office-bearers for 1999/2000 are unchanged, as shown on this page. The Minutes and Accounts are reproduced on pages 7-9.

Although there was a significant deficit in the Accounts for the year ended 31/3/99, some £300 was received afterwards relating to 1998 magazine advertisements, etc, and the overall financial situation is very sound.

Congratulations to Simon Gillam on becoming Scottish Champion for 1998/9! Although 3 games remain to be concluded, Simon is already assured of outright first place, but there will be a close finish for the other top placings.

The Bernard Partridge Memorial Semi-Finals are nearing a conclusive stage with several players virtually assured of places in the 12-player Final.

The interest in Email CC continues to increase and the Scotland "A" team qualified for and has begun play in the first-ever ICCF Email Team Tournament Finals - details elsewhere in this magazine.

For those with Internet facilities, please visit our Website - the URL is shown beneath the list of office-bearers on this page.

The 1999 ICCF Congress will take place in Thun, Switzerland and will be attended by SCCA Delegate, George Pyrich, and myself. It is anticipated that Colin McNab and Philip Giulian will be amongst the first group of players to be awarded the new Senior IM title for achievement of the requisite norms. Our Autumn 1999 edition, which is planned for late October/early November, will contain a detailed report on the ICCF Congress and the elections for the 4-vear period from 1/1/2000.

Unfortunately, we have had to reduce the Summer magazine to 36 pages, as we have not received sufficient material to fill our normal 40 pages. So, this is a plea to all members to try to send us interesting articles for our next editions - the magazine depends on **your** contributions and games!

SCCA member, John Ellison, has written to us saying

"A long-term South African friendly opponent of mine is seeking new CC opponents of strength 2000+ to play against him since the demise of the South African CC Association.

André is a friendly, English-speaking opponent and can give anyone a good game. His address is:-

André de Beer, P.O. Box 9749, George 6530, South Africa."

[Come on, Scottish CCA players, why not contact André for a good game and interesting correspondence?! - Editor]

Scottish Chess Association

... promoting chess throughout Scotland

Individual membership for one year costs only £23

Benefits

- * Scottish Chess Magazine 6 issues per year

CHALLENGE TOURNAMENT

[by Bernard Milligan]

As I write this, summer has well and truly arrived. I hope you have all been enjoying whatever fine weather we have had. Hopefully the summer holidays will have recharged your batteries and the brain's chess cells are again firing on all cylinders.

Latest news on the Challenge front is that Helen Giulian, to the best of my knowledge, is the youngest player, at 8 years of age, to ever enter the tournament. A big welcome to Helen! I hope that she thoroughly enjoys her games and is with us for many years to come. Alan Petrie is the latest player to throw down the Challenge to Novag Sapphire. Fame, if not fortune, is still available on these pages for those who can beat it! Thankfully more players are beginning to put pen to paper and send in their Challenge games for the Games Section. Games are always welcome.

Now that we have reached mid-season, we are beginning to get a number of results coming in. As usual, players are reminded to keep a close eye on the results printed in the magazine to ensure their accuracy. Also occasionally some letters go astray in the post, so if you have sent in results before mid-July and they haven't appeared in this column, then please drop me a note and let me know.

We will be having a drive to attract new members for next season. Current members will be able to gain big discounts on their own membership fees for introducing new members. Now is the time to start extolling the virtues of correspondence chess to all your friends. Remember the more active members we have, the greater the variety of opponents there will be for you to pit your wits against.

Pairings since the Spring magazine are as follows: -

Class 1		Class 3	
R Beacon (155)	388	O De Sousa (388)	155, 317

Overseas Subscribers

Subscription for one year's editions of the Scottish CCA Magazine can be obtained from the Editor for £20, or £30 for 2 years (inclusive of airmail postage). Payment in £ sterling please to the Scottish CCA.

Address Changes?

Members are asked to advise changes of address promptly to their opponents, tournament secretary, the Scottish CCA Secretary and the Editor of the SCCA Magazine, please.

☆ Membership Discounts ☆

For next season, current members may claim a £2 reduction on their membership fee for introducing one new member and £2 for each further member. A "new member" is defined as someone who has not been a member in the last two years.

Please send results to your Controller immediately on completion of each game (whether it is a win, draw or loss!)

100 CLUB

This is a club for members who would like to help with the development of the Scottish Correspondence Chess Association. Currently there are almost 80 units issued but we need to increase this to 100 - please help us!

The subscription is only £1 per month per unit, with two prizes each month currently approx £24 and £16 respectively - members may apply for more than one unit if they so wish!

A monthly bankers order form can be obtained from our Treasurer, David Kilgour, "Willowbank", Peebles Road, Galashiels, TD1 1TH. If you return it to him before the 10th of the month, then you will be eligible to be in the draw for that month.

SCOTTISH CORRESPONDENCE CHESS ASSOCIATION

Minutes of the Annual General Meeting held at The Ginger Jar Coffee Shop, Galashiels on 13th June 1999.

Present: D.A. Kilgour (President), J. Anderson, I. Mackintosh, B. Milligan, G.D. Pyrich, I. Sneddon, T. Thomson

Apologies: R.W.M. Baxter, C.R. Beecham, A.P. Borwell, J. Falconer, S. Hilton.

President's Remarks

The President welcomed everyone to the meeting and summarised what he believed had been an overall positive season. The Website was proving successful and was progressing well. Financially, the accounts showed a loss for the year.

The Minutes of the last Annual General Meeting held on 7th June 1998, which were published in Magazine No 62, were approved.

Secretary's Report

The Secretary reported the following:

- In terms of membership, the Association appeared to be rather static, and there were also fewer players competing in domestic tournaments; this was despite the considerable efforts of the Membership & Publicity Officer, Bernard Milligan in looking for and encouraging potential new members and tournament participants.
- In the domestic tournaments ending in 1998, there were joint winners of the Championship in lain Mackintosh and Jonathan Lennox. There were again three divisions in the League which, as usual, were highly competitive.
- The Association continued to be indebted to the hard work put in by the Tournament Controllers, without whom
 there would be no domestic competitions.
- The Association's Website continued to be visited on a regular basis and the content was progressing well.
 Congratulations were due to lain Mackintosh for the work that had been put into the Website.

Treasurer's Report

The Treasurer presented audited accounts for the year to 31st March 1999 (see details on following pages).

Minor comments were made and movements from previous year explained. Specific comments were:

- 1999 showed a loss of £615
- The Association was no longer receiving any income from the sale of post cards or from Q.B.S.

No questions being asked, the accounts were accepted unanimously.

International Secretary's Report

The International Secretary reported the following:

- The year had been a positive one in terms of the Association's performance and representation in ICCF events. In the year to come, we could look forward to further opportunities for success.
- Scotland had finished equal third in the Olympiad Final X1. This had been a tremendous achievement and of
 great credit to the participants and the Association.
- The Association had a new I.M. in Joe Watson and was anticipating two new Senior I.M's in Colin McNab and Philip Giulian.

Election of Office-Bearers

The following were elected to the Executive Committee:

President:	D.A. Kilgour
Vice-President:	I. Mackintosh
Secretary:	I. Sneddon
Treasurer:	D.A. Kilgour
Assistant Secretary:	J. Anderson
	G.D. Pyrich (also ICCF Delegate)
Assistant International Secretary:	T. Thomson
Grading Officer:	R.W.M. Baxter
Publicity & Membership Officer:	B. Milligan
Magazine Editor:	A.P. Borwell
Treasurer: Assistant Secretary: International Secretary: Assistant International Secretary: Grading Officer: Publicity & Membership Officer:	D.A. Kilgour J. Anderson G.D. Pyrich (also ICCF Delegate T. Thomson R.W.M. Baxter B. Milligan

It was desirable to have separate officials as President and Treasurer and suitable consideration would be given to this objective during the next term of office.

Thanks were given to all for their efforts over the last year.

Election of Auditor

It was agreed that Mr Stuart Mackenzie be officially appointed for the ensuing year.

Subscriptions

It was unanimously agreed that the subscriptions for 1999/2000 would be unchanged i.e. Ordinary Membership would remain at £15 and Life Membership would remain at £75.

It was further agreed that there would be no increase to tournament fees.

Any other business

The Association to go ahead and purchase a Website domain name.

Auditor's Report

I have examined the foregoing accounts and have obtained such explanations as I consider necessary. In my opinion these accounts give a true and fair view of the state of the Association's affairs at 31 March 1999. (signed) Stuart Mackenzie

Readers' Letters

We'd be pleased to hear from you, with your views and suggestions about the Association. Letters will be published in future editions of the Magazine, with appropriate responses, for the interest of all members/subscribers.

ChessBase 7 (Part 2)

[by Bernard Milligan]

In our last edition, we printed the start of this article but then "cut Bernard off in his prime" - a very dangerous thing to do! However, it transpired that the Email file which arrived was only part of what he actually despatched. So, with these new technologies, we must all guard against thinking that it is always foolproof! To do justice to Bernard's article, we now publish the unexpurgated version to ensure readers derive the maximum benefit from his words of wisdom and technical advice!

My first article on ChessBase 7 seems to have been well received and I have decided to write a further article, which may develop into a series depending on our reader's wishes.

This time round I intend to take a closer look at databases and their usefulness to correspondence players. I hope you all read John Mackie's letter in Magazine 64. John is perfectly correct when he points out that many databases contain inferior games by inferior players, and that many of these games contain blunders. This is particularly true with an ever-increasing number of cheap databases appearing on the market.

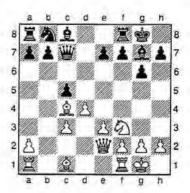

This is not to say that games by weaker players may not be useful but it does mean that the correspondence player will have to pay far greater attention when evaluating the strength of any particular move. I wouldn't consider myself to be even a moderate player, yet some of my games have appeared in the analysis of books by top players. Indeed even weak players can on occasion find moves and lines which are well worth considering.

One way to cut out the weaker games is only to buy high quality databases such as ChessBase's Mega Database '99, but these are costly and retail in the UK at around £185. This sounds a lot but Mega Database '99 contains 1.1 million games and approximately 30,000 of these games are annotated. Looking only at the annotated games, if we guess that the average book contains 500 annotated games, then that is equivalent to 60 books. If the average book costs £14.99 then that would work out at £899.40's worth of books. Perhaps Mega Database isn't quite so expensive when viewed in those terms.

Anyway onto the main point of the article and a basic look at the use of databases. Compared to a book, which will follow an annotated game with the occasional game thrown in, a database is capable of finding perhaps several hundred games from a given position. This is particularly true at the start of the game. The book annotator from the same position may give several lines of analysis but these will generally only concentrate on the candidate moves which the author considers relevant. The database simply identifies all the games where that position has been reached.

The following moves were played in a game in the SCCA Championship a few years ago.

1d4 包f6 2 c4 g6 3 包c3 d5 4 包f3 息g7 5 e3 0-0 6 cxd5 包xd5 7 息c4 包xc3 8 bxc3 c5 9 0-0 營c7 10 營c2.

A fairly standard position has been reached but I will use the Opening Report in ChessBase 7 and Mega Database '99 to see what sort of information I can gain after White's 5th, 6th, 7th, 8th, 9th and 10th moves. Looking only at the recommended main replies for Black and the statistical information produced, the following was found:-

- 5...0-0 Black scores above average (50%) 1564 games.
- 5...c6 Black scores below average (41%) 37 games.
- 5...e6 Black scores well (55%) 10 games.
- 5...c5 Black scores below average (41%) 23 games.
- 5... £f5 Black scores excellently (67%) 3 games.
- 5... 2 c6 Black scores badly (33%) 3 games.
- 5...h6 Black scores excellently (67%) 3 games.
- 5... 2g4 Black scores averagely (47%) 7 games.
- 6... 월xd5 Black scores above average (52%) 264 games.
- 7...2xc3 Black scores above average (50%) 134 games.
- 7... 2b6 Black scores above average (50%) 122 games.
- 7...c6 Black scores above average (50%) 3 games.
- 8...c5 Black scores above average (50%) 126 games.
- 8...b6 Black scores excellently (70%) 5 games.
- 8... 2c6 Black scores miserably (20%) 5 games.

ChessBase 7 (Part 2) cont'd

9... 世xc7 Black scores well (55%) 18 games.

9... 2 c6 Black scores averagely (47%) 41 games.

9...cxd4 Black scores below average (37%) 4 games.

10... Ag4 Black scores above average (50%) 18 games.

10... 全c6 Black scores below average (47%) 18 games.

10...b6 Black scores excellently (68%) 14 games.

10... 全d7 Black scores well (62%) 5 games.

Clearly the first thing to note is that this is statistical information based on the games found in the database. The information produced can therefore only be as good as the information contained in the database. It may well be that all the games found on a particular line have produced good results for one side or the other but that does not necessarily mean that any suggested move is best. Recent developments may have found a new move that totally overturns previous theory and has the other side winning easily. It is therefore very important for the correspondence player to keep their database up-to-date by adding new games on a regular basis in order to keep abreast of current theory.

It is the responsibility of the player to check all the suggested moves themselves, and indeed to seriously look at other possibilities. This said, the information produced is a good guide to help the correspondence player navigate the opening and emerge with a position which is hopefully to their advantage and at the very least gives them an even chance of doing well.

The advantage of ChessBase 7 is that information can be found quickly and this allows players to devote more time to actually analysing the positions in their games. Clearly it is also an advantage to be able to instantly look at any of the games that have been found pertaining to a particular line which you are investigating, and with ChessBase it's a simple case of clicking on the game and you can instantly play through it.

Books may only give a few moves in a particular line and you have to constantly reset the board after playing through sub-lines. Often a book will also not mention a weaker move, which has been played by your opponent, so you may be left wondering what is the best way to take advantage of that move. Having a large database gives you a better chance of finding games where that move was played, and therefore getting an insight into possible ways of maximising any advantage that may come your way.

I don't know if either player used ChessBase in the above game, but it is interesting to note that at each of the junctions looked at, Black played what ChessBase reckoned was the best move from previous practice. Indeed Black did go on to win the game in question. Possibly both players were following book lines but with books you can never be sure whether or not your opponent has a better book than you do. Databases give you all the information and let you evaluate the usefulness of the moves yourself rather than rely on limited theory from perhaps a single reference manual.

New database formats are now appearing with ChessBase producing training CD's such as Amador Rodriguez's "Modern Ways of Playing the Sicilian". This particular CD has a database of nearly 6000 games as well as a tutorial format where the author guides you through the various ways of handling the variations under investigation. Useful test positions also help you evaluate how well you have understood the various lessons on the CD. It is possible that this format may become a serious rival for books as more and more opening CDs become available.

Malcolm Pein from The London Chess Centre has provided invaluable assistance in my research into ChessBase. Readers can obtain up-to-date information on what is currently available and useful advice on what would suit their needs by calling 0171-388-2404 during normal office hours. As Malcolm advises me of further developments, I will endeavour to keep our readers informed. In the meantime if you have any specific questions, then drop me a note and I will try to answer them in a future article.

EVERYMAN

CHESS

Easy Guide to Bb5 Sicilian by Steffen Pedersen 128 pages, £12.99

This is a useful book for 1 e4 players who are needing a different weapon to counter the intricacies of main line Sicilian variations.

Although it claims that Bb5 is "completely logical," most chess players know of the dangers of the a6/b5/c4 trapping of the bishop. Therefore, in many lines, the white-squared bishop is exchanged on c6 or d7.

Kasparov recently employed it in his first correspondence game (by Email against "the world"!), so it is certainly in vogue at present.

GAMES SECTION

Selected by GAMES EDITOR Bernard Milligan, 15 Bothwell Court, Hawick. TD9 7EP

Members have been kind and responded well to my plea in the last Magazine for more annotated games. As a result, the games in this edition cover a wide variety of playing styles and strengths. I hope you find them enjoyable.

More games are always required so please keep up the good work and send in as many as possible, as soon as possible.

Technical problems resulted in a couple of games being omitted last time out, and one game being printed twice. Please accept my apologies. I hope this didn't spoil your enjoyment too much. We are all human, although my son claims I am not, and mistakes happen from time to time. Please be assured that we will always strive to keep them to a minimum. [All blame for the mix-up lies with the Inchture team - our apologies!]

學學

On the domestic front, Simon Gillams' results in the 1998/99 Championship mean that he can no longer be caught and will be awarded the title. Having played through his game against lain Mackintosh, it is clear that the title is richly deserved. Congratulations to Simon and let's hope he continues to enthrall us with such interesting games for many years to come.

Fittingly, I will begin this column with that particular game which lain recommended for publication in this column. Simon's comments at move 35 should be food for thought. The Fritz analysis module at this point gave 35 🖹 xe6 as winning for Black. Shows how wrong the silicon chips can be!

SCCA Championship 1998 White: S Gillam (2385)

Black: I Mackintosh (2295)

Slav Gambit [D31]

[Annotator Simon Gillam]

1	d4	e6
2	c4	d5
3	2c3	c6
4	e4	

This was the first time I had played the Slav Gambit. I think that I was first made aware of the ideas behind the opening 3 or 4 years ago when Edinburgh West were preparing for a Richardson Cup match, but I had never tried it OTB. My book knowledge was limited to the final chapter of Peter Wells' 1994 book on the Complete Semi-Slav, which featured the game Lautier-Gurevich, Biel IZ 1993.

4	31175	dxe4
5	2xe4	₫b4+
6	₽d2	營xd4
7	∆xb4	₩xe4
8	∆e2	2a6
9	Ac3	2e7
10	₾xg7	Eg8
11	₫f6	營f4
12	&c3	Exg2
13	全f3	f6

Analysis by Lautier and Wells suggests that 13 Eg8 should be looked at as an alternative to 13 ... f6.

14	쌀d2	增xd2+
15	2xd2	e5
16	2e4	⊉ 17
17	国d1	且g8

Lautier and Wells analyse 17 全c7 as better than 17 ... 且g8.

18 f4 2f5

19	fxe5	fxe5
20	且f1	

20		Że7

21	Axe5	2 b

Black's plan of giving up the e5 pawn to mobilise the Q-Knight is a reasonable try.

22	월 d6	2 c2+
23	⊈d2	≅g2

24	₫f6 +	≌ 17
25	₫c3	ace3
26	国 f6+	⊉g8
27	且f2	国 xf2

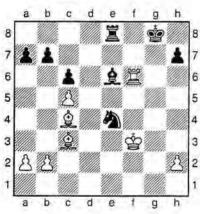

28	包xf2	∆ d7
29	2e4	

Here I thought I had let much of my advantage slip, because lines like 29 全g4 全xg4 30 全xg4 left me with very little (30 ... 量d8 and 30 ... 量f8 are both OK). Had I missed a better attacking plan in the last 10 moves, or is White supposed to be happy with this late middle-game position? If I am supposed to be winning, then 29 全e4 followed by 30 全d6 looks the only serious try.

29	*****	單 d8
30	2d6	Ac8

Black had several alternatives here, but I thought I retained enough advantage to have good winning chances. Perhaps the best was simply 30 ... 全xd6 31 章xd6 全f5 32 章d3. Other possibilities included 30 ... 急e8 31 c5 全xd6 32 章xd6 章xd6+ 33 cxd6 全d5 34 条g4 全b6 35 条e6+ 全f8 36 条d4 good for White; or 30 ... b5 31 c5 全d5 32 全xf5 全xf6 33 条xf6 章f8 34 全h6#

31	c5	包xd6
32	≌xe3	∄e8+
33	當f3	2e4
34	&c4+	∆e6

35 Axe6!!

35	alian.	2g5+
36	≌g4	2 xe6
37	⊈f5	堂f7
38	₫ f6	b5
39	cxb6	axb6
40	a4	b5
41	axb5	cxb5
42	∆ d5	b4
43	b3	⊈f8
44	∆ xe6	

I was sure that 2B+2P versus R+2P ending should be winning, but it isn't as easy as I first thought. I felt there should be a way to get at the black b-pawn, using the 2 Bishops to fend off the Rook.

44		∄a8
45	₫ d4	□ a2
46	h3	⊈e8
47	⊈f6	≅c2
48	h4	Ac6

Manoeuvres to pick up the loose b-pawn are not so easy, as lines like 48 &f5 \(\beta \)d2 49 &c5 \(\beta \)d5 50 &xb4 \(\beta \)b5 demonstrate. I need to use the h-pawn as well, to threaten mate if the black King stays on the k-side, or to pick up the h-pawn for the b-pawn and win the pawn race. The only thing to watch for is by pushing the h-pawn to h6 to threaten mate, I could leave a stalemate if Black sacs the Rook.

	유유	骨骨

Rarely do we come across players who are willing to annotate games which they have lost. Such brave spirits deserve to see their games in print. Chris McIntee is one of the select few who are willing to do just that, as the following game demonstrates. I hope to include some of Chris's wins in future columns.

Perhaps Chris's willingness to closely examine his losses helps his overall chess development for the future. It is certainly a lesson many of us could benefit from. Far too often we fail to take a good look at our games after they are finished. The process of annotating a game can reveal some startling insights into how we can improve in the future.

ICCF TT/11/98/2, 1998 White: C McIntee

Black: R Felipe Martinez

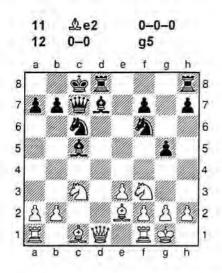

Queens Gambit D32

유유유유

Two things attracted me to the following game. Firstly, the international aspect, which always appeals to our readers, and secondly, a classical opening, which I have never played, and should probably study if I ever want to improve my prospects.

ICCF World Cup XI

White: C J Lennox Black: G Landeck

Reti Opening [A09]

[Annotator - C J Lennox]

My opponent didn't play very well in this game, but it had a number of pleasing features for me. As my comments are a little in the style of lan Marks, I'm tempted to say it made me 'glad all over', but I'm not sure how many of our readers will remember the Dave Clark 5.

1	2f3	d5

6	₫b2	全f6

"Black develops his pieces sensibly but with no specific aims in view" - Ray Keene commenting on Andersson - Radulov, Nice 1974. In that game, Black played b6 and \$\&\text{b7}\$ but the salient feature is the same. White's control of e5. Black's best plan involves f6 and e5, as Alex Nisbet demonstrated to me in the SCCA Championship 1997-98.

7	国c1	e6

Attacking c4, f3 and b1, but after

34 c7

Black resigned since 34 ... \$\mathbb{Z}\$ c8 35 \$\mathbb{Z}\$ c3 wins a piece and 35 \$\mathbb{Z}\$ d4 is even stronger.

Next a game from new contributor D J Stewart. Jim sent me a few games so you might see some others popping up in future magazines. Jim also sent the following photograph of himself.

It's unclear if this is a current photograph, but if it is, and the following game was played in 1983, then Jim appears to be one of those annoying immortals who never age. I will leave it to our readers to investigate further.

PCC "All-play-all", 1983

White: A Grimmer Black: D J Stewart

Two Knights Defence [C57]

[Annotator - D J Stewart]

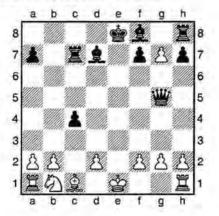

1	e4	e5
2	2f3	2c6
3	Ac4	2f6
4	⊉g5	d5
5	exd5	2 d4

Way back in 1983 the moves 5 ...

244 and 5 ... b5 looked worthwhile. I wonder what current theory says.
(BM: Both lines are still part of current playing practice with reasonable chances for Black in both lines. GM's Hebden and Picket have both ventured the 5 ... b5 line and GM's Timman and Yurtaev have both played the 5 ...
244 line.)

6	c3	b5
7	cxd4	bxc4

Incredibly all of White's 10 or so moves have been forced! - now he's quite lost!

24	쌀e8+	⊉b7
25	ģd1	堂xf1+
26	Żc2	₫f5+

I'm sure I enjoyed that one!

0 1

유유유유

Alan Petrie has been one of those useful players in the Challenge Tournament who has always been willing to take on extra opponents whenever I called him. I was therefore delighted when he sent me the following game for inclusion in the magazine.

SCCA Challenge, 1999

White: A R Petrie Black: J P Jack

Stonewall Attack [D00]

[Annotator - A R Petrie]

1	d4	d5
2	e3	2f6
3	₫d3	e6
4	නු d2	c5
5	c3	c4
6	&c2	b5

This is quite common in the Stonewall Attack. White castles short and Black long and once the centre battle has been resolved a pawn race follows.

7	包df3	≙c6
8	2e5	∆ b7
9	f4	

The Stonewall is established. Black can try 8 ... 2xe5 9 dxe5 2e4. This Knight can be a thorn in White's side as either the king-side pawn structure is weakened or the better white-squared Bishop is traded.

9	****	2 xe5
10	fxe512	

I decided it was better to keep the centre closed and try to control the f-file.

10		2d7
11	⊉h3	쌀c7
12	₩f3	f6?!

13 0-0 0-0-0

White has more space and the idea of opening the f-file looks even more appealing.

> 14 exf6 包xf6?! 15 2 q5

White normally plays 包f2 followed by e4. 15 2q5 is a bit of a cheapo and I was surprised by Black's reply.

\$d7?

Better is 15 ... 且e8 16 堂h3 点d6 17 a4 b4 18 cxb4 h6 19 2 xe6±.

₽d6

> ġg2 294 21 22 **쌀f7+** 0 1

Note the Queen's Rook and Bishop never moved during the game. The Stonewall might not be everyone's cup of tea but in the right circumstances it shows what can be done with Queen and minor pieces.

Anyone who has ever played Geoff Lloyd will no doubt have enjoyed a fair bit of correspondence with him. He's one of those players you eagerly await moves from, not only to see what he has come up with, but for the friendly banter. He's also one of the most prolific players I have ever seen. I sometimes wonder where he finds the time to keep up with all his games.

유유유유

Steve Hilton had sent me four games for magazine 65. Here are the ones which were left out last time.

BPCF Open

White: S. Hilton Black: J. Cadman

King's Indian Defence [E70]

[Annotator - S Hilton]

1	d4	2 f6
2	c4	g6
3	2c3	∆ g7
4	e4	d6
5	6 002	

This line is known as Kramer's Variation though the Hungarian GM Szabo did work this line.

> 5 0-0 6 ⊉q3 c5

I had lost a previous game to John where I had played the Averbakh variation (5 &e2, 6 &g5). This move was expected.

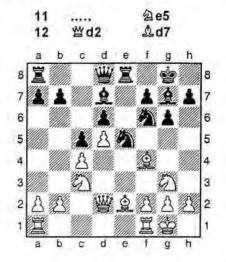

7 d5 e6 8 ≜e2 exd5 9 exd5

9 cxd5 by White gives the position a Benoni type pawn structure.

9 国e8 10 0-0 包bd7

11 Af4

The major alternative is f4 which can allow Black to sacrifice a pawn. 11 f4 a6 12 f5 b5 13 fxg6 hxg6 14 cxb5 營b6 15 營h1 axb5 16 总xb5 总a6 17 总xa6 營xa6 18 总f4 包e5 19 邑b1 邑ab8 20 營d2 邑b4, as in Rembinger - Pendersen, Gausdal 1991.

Now I'm out of the theory available to me.

13 点g5 ≝b6

This move for Black is wrong as I felt that the Queen is better placed on a5 and on b6 it hampers any queen-side counterplay with b5.

14 f4 包eg4 15 f5

Necessary to try and deny the e3 square for Black.

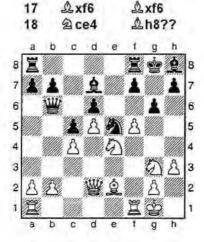

15 Bf8?

16

h3

15 ... h6 is necessary for Black here now or on the next move.

2 P5

Where does this Bishop go? There is no active square for it. I feel it cannot go to h4 as White plays 当h6.

19 f6 耳fd8 20 b3 点c8

This is necessary to allow the Black Knight access to f8 via d7.

21	当h6	包d7
22	全g5	全f8
23	∆d3	&d7
24	2 xf7	
	1	0

If Black takes the Knight, White sacrifices the Bishop with Axg6+, If Black takes with the pawn the Bishop on h8 falls or if Black takes with the Knight 增xh7+ 增f8 增xg6 is winning clearly for White.

유유유유

BCCC Reserves White: K. Crane

Black: S. Hilton

English Opening [A28]

[Annotator - S Hilton]

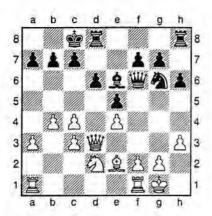

1	c4	2f6
2	2c3	e5
3	e4	2 c6
4	全f3	₫b4
5	a3	Axc3
c	duas	de

Maybe Black could have safely taken the pawn on e4, though this would cost him two tempi in retreating the piece, hence my reason for playing d6.

7	∆ g5	h6
8	&xf6	世xf6
9	h3	&e6
10	W/ d3	0_0_0

Risky but worthwhile as Black has a lead in development.

11	∆e2	2a5
12	包d2	2c6
13	b 4	2e7
14	0-0	206

An interesting position is reached. White is trying for a queen-side attack whilst Black is trying for play on the king-side. However Black's pieces are supporting the attack whilst White's are not and that is a crucial factor in what follows.

15	世e3	άþ
16	b5	2f4
17	≌h2	g5
18	g4	

This unnecessarily weakens the king-side.

18	Mark	h5
19	gxh5	包xh3
20	世g3	2f4
21	₫g4	∆xg4
22	档xg4	国 xh5+
	0	1

Black has won a pawn and maintains his initiative.

Letter to the Editor:

Fritz 5.32

"I was fascinated by John Mackie's letter in the last magazine but felt his comments in the title saying "Fritz is blind" were perhaps a bit unfair. I don't have Fritz 5.32 but ChessBase 7 does have the older Fritz 5 analysis engine. This engine did indeed find 19 Rxd7 but it took about 15 minutes to find the move on a Pentium II 300. After 30 minutes Junior 5, which is also a 32 bit engine like Fritz 5.32, still hadn't found the rook move. Clearly, different engines look at different positions in different ways. Some may be more tactically orientated whereas others might be more strategically orientated. A good example of where computer programs seem to constantly miss the point can be seen in Simon Gillam's game in the Games Section.

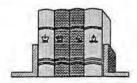

It is probably unfair to say that a particular engine is blind. A good number of human players would miss certain moves in certain positions. As humans, we tend to play according to the way we have been taught using the accumulated knowledge gained over many years. Just because we miss certain moves doesn't mean that we deserve to be called blind. Similarly, a chess program is limited in what it can play by a number of factors. One is obviously the way in which the programmer has designed it to evaluate certain possible moves. Another will be the power of the processor and memory available in whatever computer the program is running on.

Perhaps we simply still expect far too much from a PC-based chess playing program. I have yet to see the program or human who can spot everything. When that day comes, perhaps chess will die as every game is reduced to the perfect move being played at each point. To be fair, the current programs play a very good game of chess and are worthy opponents for a large number of players. Simply playing against them could probably do most players a great deal of good as they are forced to develop their analytical skills by examining more variations in order to come up with the correct plan to win the game."

Bernard Milligan.

reviewed by Alan Borwell

BATSFORD

40 Lessons for the Club Player by Aleksander Kostyeu 216 pages, £11.99

Reprint of a 1986 book, which focuses on practical opening, middle and endgame themes, using 40 defined lessons. Includes some interesting topics based on chess history.

Queen's Gambit Accepted by Chris Ward 160 pages, £14.99

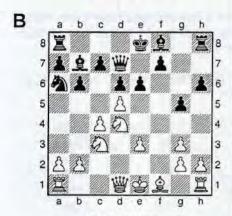

"A sharp and sound response to 1 d4," is the claim of this new book, the latest in several covering the capture of White's gambit pawn.

It features 90 complete games from most of the main variations, with 50 pages each on 3 e4, 4 e3, and 4 other moves.

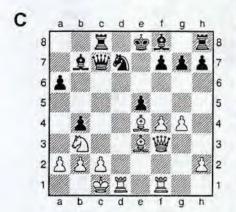

For correspondence chess players, a note of caution should be given, as acceptance of the gambit pawn can lead to many quite difficult positions. Great skill and accuracy is needed by players with the black pieces. Perhaps, significantly, the author does not include any CC games in his selection, although several leading GMs have used this defence for their postal games.

Grading List 1999

[by Raymond Baxter]

The grades shown in this list take account of all games reported to the grading officer by 31/12/98. These grades will be used for games starting in 1999. All SCCA events listed in the magazine are included, except the Openings and Endgame tournaments. Friendly internationals are also included if the opponent's grade is known. Grades are calculated for players who have had eight or more results, provided these results were against graded players, or against ungraded players for whom it has been possible to estimate a grade.

The following members were active in 1998, but have not yet accumulated the required eight results, and therefore have no grades, NJ Banner, DE Brown, R Douglas, R Gascoigne, J Hamilton, GP McCoy, GAA Murphy, S Nicoll and G Swan.

Two years ago the SCCA grades were increased by up to 200 points to make them more consistent with the ICCF grades. This means that for those who play both correspondence and over-the-board chess, their correspondence grades may well be substantially higher than their over-the-board grades.

The method of calculation was set out in magazine no 54 of July 1996. Since then a few changes have been made to improve the calculations, particularly for those with less than 30 results. If you would like to see details of your own grade calculations, or if you think the data held for you may be wrong, let me know.

Where an SCCA member has a grade published in the ICCF list of 1/7/99, then this grade is shown, marked "i". A provisional grade (ie one based on less than 30 results) is marked with an asterisk.

GAMBIT

Publications Ltd

The Dynamic English by Tony Kosten 144 pages, £12.99

A very welcome new book on this important opening, rather neglected by writers. It concentrates on aggressive variations and concepts and is recommended for CC players.

GM Tony Kosten is a good author, with clear and helpful analysis and comment, including perceptive insights into the differing pawn structures and key dynamic elements of typical positions which can arise.

Thinker's Press Inc.

Practical Chess Analysis by Mark Buckley 192 pages, \$25

This is an updated third edition of a popular and informative book by this USCF Senior Master.

Encourages deeper analysis of positions focusing on 'quality' rather than 'quantity'.

£29 for 11 issues in 1999. Excellent value!

E-MAIL CHESS BY A COMPUTER BEGINNER

[Philip Giulian]

Last Christmas I bought my first computer. This was very much a step into the unknown, because even at work I have virtually no experience of computers. To describe me as a novice would be a complement. One of the reasons for buying the computer was to play chess by e-mail, and it was a short time before the first E-mail World Semi-Final was due to start. Hurriedly, I contacted George Pyrich, and was fortunate to be given one of Scotland's four places.

I was more than a little apprehensive of whether I could master the technology, and soon some of my opponents had sent greeting messages. Immediately I was reassured. A number of my opponents admitted to having little knowledge of playing by e-mail and they apologised in advance for errors. Soon it was time for the games to start. It took me four or five moves to sort out a good method of playing, but by then the whole process had become very easy. My moves were winging their way around the world as if I had been an expert for years!

Whatever my expectations at the start of the event, they were far surpassed by the reality. Gone were the long postal delays as moves were delivered within a few hours, and soon they were on the way back. At the beginning I was able to spend a lot of time on the games and they proceeded very quickly. Later on I slowed down as I became busy with other things. With an average of four days per move, it is easy to play at a speed which suits me.

One of my fears at the start was that I would end up playing against computers, a completely pointless exercise because I could do this at home without bothering with e-mails. Here again I was reassured, as various people I spoke to agreed with my views. Sometime I would be interested in a player justifying the use of computers.

The bottom line of all this is that playing by e-mail is great fun! Don't be put off by the technology. It is very easy and if I can manage it, you certainly can!

Some years ago I lost a postal game to Anatoly Kamenets. I was never very sure of whether he ground me down in the ending, or whether I lost because I had lost interest after all the postal delays. This time there would be no doubt.

World Email Semi-Final

Dutch A81

1	d4	f5
2	g3	全f6
3	∆g2	g6
4	⊉h3	₫g7
5	2f4	2 c6
6	d5	2e5
7	h4	c6
8	全c3	增b6

As far as I know, this is a new move. Pugacev-Rublevskij 1991 continued with 8 ... 0-0 9 h5 cxd5 10 hxg6 hxg6 11 acxd5 axd5 12 axd5 e6 which the books give as unclear, but I am suspicious of Black's position. My move pressurises f2 and b2.

9	0-0	0-0
10	e4	⊉eq4

Fritz reckons that after 11....fxe4 12 2xe4 2xe4 13 2xe4, Black is better but I am not so sure.

11 営e2

I was more worried about 11 exf5 gxf5 12 営e2.

11		e5!?
12	dxe6	dxe6
13	WCA	

Now I had intended to play 堂h8 so that 14 包xe6?? Axe6 15 堂xe6 包xf2! is very strong. However, the more I looked at 包xf2, the more obsessed I became, until it became the move I couldn't stop my hand from playing. Sanity or Fritz would have told me otherwise.

13	*****	② xf2?!
14	且 xf2	2 g4
15	≙h3	

The main alternative was 15 包d1 fxe4 16 營e2 包xf2 17 总e3 总d4 18 总xf2 总xf2+ 19 營xf2 營xf2+ 20 包xf2 e5 and Black is better

15 Ae5

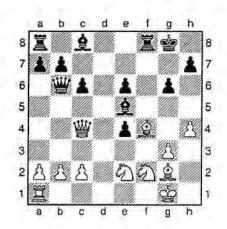

Originally I had intended 总d4 but I found that White could gain an edge with 16 堂e2 e5 17 包d1 fxe4 18 c3

16 名e2

After 16 包a4 增b5 is better for Black

16 fxe4 17 &f4 &xf2?

Given what happens in the game, I would have been better playing \$\triangle xb2\$ immediately, but I was concerned that after \$\triangle b1\$ he may have been able to play \$\triangle xb2\$ at some stage.

18 Axb2??

I know this is such an obvious error, but I wanted to play e5 and I couldn't see how the bishop was lost! Better was 18 ... 当xb2 19 邑e1 当b6!

19 萬61 萬67

Now I thought his only tries were 20 ac3 e5 21 aa4 ad4 22 axb2 exf4 and Black is better, or 20 axe4 ad4 21 ab3 ab6 which I felt was about equal.

20 q4!!

This is one of the most remarkable moves I have ever seen. It loses a pawn, develops my bishop, removes some protection from his king, and allows me to break the pin on my bishop on b2. Yet it wins!!

20	······	e5
21	∆g3	₾xg4
22	≌h2	△xe2
23	当xe2	쌀d4
24	6001	

Now I suddenly realised what was happening. The threat is 全h6+ and this knight is going to win the bishop on b2.

24	****	且 e7
25	₫f2	世c3
26	2f6+	⊈g7
27	2 xe4	쌀a3
28	c3	₩xa2
29	国xb2	当17
30	2 d6	

... and I resigned.

Bobby Fischer An Attempt at Analysis Part 2

[by Carlos Almarza-Mato]

The Prevention of the Opponent's Counter-Play

One of the most important parts in the armoury of a top chess-player is that of the prevention of the opponent's counter-play. It implies the realisation that in chess your opponent's plans and ideas are of the same importance as one's own and that the discovering of his occult plans is as relevant as finding the best moves and plans for one's army. (Some players - Petrosian, Karpov, Nimzowitsch - have or have had this as their main feature in their approach to chess.) This part of the playing method implies the existence and putting into action of what has been termed as "preventive thinking."

The difference between Fischer and the defensive players is that for Bobby this is a part in the whole of his approach to chess, and only a part, not a goal to achieve. He starts the game, realises the strategical aim of the opening and the ensuing positions, and only in certain cases with no clear attacks or combinative operations does he proceed to apply preventive thinking, and even in this case with the intention of provoking the conditions for a direct attack, always tactically fending, always provoking his rival into taking decisions. always trying to set the tempo of the game. And he does not seek the application of this method of play by principle: he prefers open positions or positions where he can impose his superior tactical ability, and in these the most important factor is not that of "preventing threats," but the creation of them to drive the opponent onto the defensive without allowing him to arrive at too levelled or too cramped positions.

This is why it is so difficult to annotate his games. Very few of his games are deeply annotated: most of these things are neglected, are unknown or pass unnoticed by most of the annotators. Even Bobby himself has not been too explicit when annotating his own games for one reason or another. The studious player has to do it even today.

Other Processes

In chess, we can admit the existence of a two-fold process:

- 1. The calculation of variations.
- The formation and handling of abstract concepts.

Everything starts with the opening. Each opening has a strategical or positional background. different variations and variations lead to different positions (= configurations of pawns and pieces). As soon as the pieces come into play, they start to create threats or fulfil missions. When the theoretical line ends or the player has to decide on his own, he has a position before him, with the pieces placed in the different squares. In some cases, he has to defend against threats or he is able to start thinking about posing threats by But in other cases the calculation of variations gives nothing: it is necessary to formulate abstract concepts for which strategy can be the only red thread. And all this is not always as straightforward Kotov, for instance, described in his books on the middle-game in chess. The player playing under tournament conditions with a time limit

In Fischer, we have one of the most superb masters at integrating both processes so conjuring up a masterpiece of apparent and delusive clarity. Once again, we have to devote time and patience to understand Fischer's train of thought.

In my opinion, it took the Russians some time to understand this, and around 1972 some representatives of Soviet chess were working under a delusion: that of his "clarity of ideas." matches against Taimanov, Petrosian and Spassky were the signal that it was not only water that fell when it was raining: for the three, the rain was one of stones. And the same is valid for Larsen.

Fischer's fame concerning his ability at calculating variations has somehow left in the shadow another of his weapons (often unnoticed or neglected by most annotators). When there is no clear, straightforward plan, Fischer is able to devise complicated, elaborate, even abstruse strategical plans by using his most powerful weapon: that of seeing in advance the nature of the ensuing positions. But we must bear in mind that most of the opinions expressed during Fischer's active years came from the Soviet Union and were full of prejudices and vested interests. After all, a simple man with limited material means (but unlimited intelligence and willpower) was able challenge a whole super-power. shouting "Check!" to the kings of chess (the Russians). And in 1972. it was "Checkmate!"

The following games illustrate Bobby Fischer's playing style.

US Championship 1965 Fischer - Benko

1 e4 e5 2 설f3 설c6 3 쇼b5 a6 4 쇼a4 설f6 5 0-0 쇼e7 6 트e1 b5 7 쇼b3 d6 8 c3 0-0 9 h3 설b8 10 d4 설bd7 11 설h4

One of Fischer's preferred strategical weapons. He has always liked clear, fixed structures with fluid play and which could lead to the opening up of the position.

11 ... 2b6 12 2d2 c5 13 dxc5 dxc5

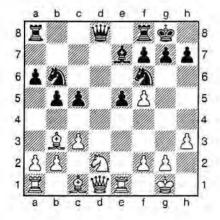

Opening the d-file. Apparently in contradiction to accepted strategical principles, Fischer is going to start a flank attack with an open centre. But concrete factors are of paramount importance: the battle to co-ordinate one's pieces to create threats forcing the opponent to unco-ordinate his when answering to the threats. Black pieces lack clear targets while Fischer is working with dynamic factors: the initiative.

14 全f5

Thematic. The knight hits e7 and d7. Fischer's plan is an all-out attack on the kingside.

14 ... & xf5 (14 ... c4 15 & c2 & xf5 16 exf5 營c7 17 營f3 單ad8 18 包e4 包xe4 19 & xe4).

15 exf5

15 ... 世c7?! (包bd7) 16 g4! (Fischer's own hallmark . . .) 16 ... h6.

Black cannot react on the centre. His pieces had to answer to concrete threats of immediate dangers. He has no pawn thrusts and White has a clear plan.

17 h4 c4 18 &c2 2h7 19 2f3!

(Through attacking e5 forces ... f6 so depriving the knight h7 from the f6 square. Subtle.)

19 ... f6 20 全d2! 昌ad8 21 当f3 h5?

A mistake. Except when concrete factors appear it is not advisable to touch the pawns on the side which is under attack. An old unwritten rule. Perhaps 21 ... \$\mathbb{A}\$ d7. Passive defence is called for although against Fischer

22 gxh5 含d5 (to bring the knight over to the kingside) 23 含e4 含f4 24 兔xf4 exf4 25 空h1 (threatening 富g1) 25 ... 空h8 26 富g1 富f7 27 富g6 兔d6?! (27 ... 兔f8!?) 28 富ag1 (the culmination of the plan initiated with 14 包f5 and the subsequent pawn attack) 28 ... 兔f8 29 h6 쌀e5 30 쌀g4 富dd7 31 f3 兔c5 (Black is in zugzwang) 32 含xc5 쌀xc5 33 莒xg7 莒xg7 34 hxg7+ 업g8 35 쌀g6 (threatening 36 쌀xh7 업xh7 37 g8=쌀) 35 ... 畐d8 36 兔e4 쌀c8 37 쌀e8+, Black resigns.

Let us look again at move 15 in the diagrammed position, if Black plays 15 ... ②bd7 the plan of g4-②f3-h4 would not work due to the fact that h4 is under attack. But White is then not compelled to start the pawn avalanche at once: 16 g4 h6 17 h4 c4 18 总c2 ②h7 19 ②f3 总xh4 20 ②xh4 營xh4 21 營xd7 營xg4 and it is a draw. Instead he can opt for a different approach: 总f2 with the idea of ②f3 increasing the pressure and keeping the plan g4-g5-h4 up his sleeve.

I have chosen this hard-fought game to exemplify Fischer's skill in the field of defence. The game features different alternatives which show how close to the wind top chess-players sail. Very often the securing of an advantage or the loss of it depends upon a single move and more when the players are playing in dynamic fashion.

US Championship 1959-60 Byrne, R. - Fischer

I have chosen this hard-fought game to exemplify Fischer's skill in the field of defence. The game features different alternatives which show how close to the wind top chess-players sail. Very often the securing of an advantage or the loss of it depends upon a single move and more when the players are playing in dynamic fashion.

1 d4 2 f6 2 c4 e6 3 2 c3 d5 4 cxd5 2 xd5 5 2 f3 c5 6 e3 2 c6 7 2 c4

Another try would be 7 &d3 cxd4 8 exd4 &e7 9 0-0 0-0 10 a3 etc.

7 ... 全xc3 8 bxc3 &e7 9 0-0 0-0 10 当e2

Books say \pm here but Black has a flexible position and as Tarrasch would say, "It is not only necessary to be a good chess-player, you must play well too." With the assessments provided by books and experts it happens much the same: given any position you have to find the best moves/plans so as not to lose the superiority.

10 ... b6 11 昌d1 世c7 12 e4 总b7 13 总e3

These positions demand deep strategical knowledge. Byme prefers to keep the tension in the centre without committing himself. A different approach to the position would be 13 d5!? exd5 14 &xd5 &f6 15 e5!? Bae8 16 &f4. The process of decision-taking in positional games implies that the player has to clearly assess the end-positions resulting from the different variations. After all, the players have to work everything out in their minds.

13 ... 日ac8 14 &d3 cxd4 15 cxd4

White has a mobile pawn centre and he will have to choose among three possible plans: e5/d5 or not touching the pawns. All strategy books and time-honoured games by Botvinnik, Spassky, Keres, etc show how to handle (or not!) these positions.

15 ... Aa3?!

Perhaps \$\mathbb{B}\$ fd8 instead. In these positions, Black has to make do with little space within his first three ranks.

16 e5!

Byrne decides to open lines against Black's king, fixing the centre and forgetting about dynamic tries based upon the d5 advance.

16 ... 2b4 17 2g5

17 &xh7?? 堂xh7 18 包g5 堂g8 19 營h5 堂c2 -+.

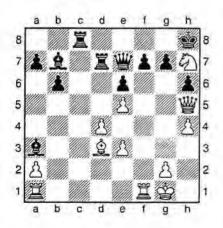

17 ... h6 18 &h7+ 할h8 19 쌀h5 일d5 20 &d3 쌀e7 21 일h7

21 &d2 &b4 22 包h7 &xd2 23 包xf8 包f4 24 營g4 包d3 25 日xd2 包b4 26 包xe6 fxe6.

21 ... 2 xe3

22 Axh6 must be prevented.

22 fxe3 單fd8 23 單f1 單d7 24 h4! - to prevent ... 營xg5 when trying to liberate the knight.

24 ... E c3!

Fischer combines passive defence with the activity of his free-from-task pieces.

25 全g5 昌xd3 26 邑xf7?!

26 월xf7 발g8 27 발g6 불d2 28 원xh6 발h8

26 ... A d2! 27 e4

Threatening 增g6 winning. If 27 Exe7 Exg2+ 28 增f1 Exe7 29 全h3 Eh2 30 包g1 增g8 and Black emerges.

30 增xe6 &b2 31 莒e1 &xd4 32 增h2 &xg2 33 莒d1! &xe5 34 增xe5 莒d1 35 曾g2 莒d2.

30 ... 喜xg2+ 31 営f1 总d5 32 昌e2 昌q4?

Analysis showed that 32 ... 富xe2 was best. In these sorts of positions, the player may feel averse to eliminate pieces. (32 ... 富xe2 33 堂xe2 &xa2 34 營xa7 &c4 35 堂e3 &f8 36 營b6 堂g8 37 營a7 &b3 38 堂d3 &d5 39 堂c3 &f3 40 堂b3 &d1 41 堂c4 &e2=).

33 월c2 ஜh7 34 h5 월g5 35 ஜe2?

It is White's turn to err. 35 營xa7 would have been much better. Probably both players were tired and short of time after so tense a struggle.

35 ... 且g2+ = 36 営d3 且g3+ 37 営e2 且g2+ 38 営e3 且g3+ 39 営f2 且g5 40 営e2 且g2+ - ½:½.

Fischer - Olafsson Mar del Plata, 1960

- Positional tension in a semiopen/open position with piece pressure.
- O Domination on the queen-side.
- O Creation of weaknesses.
- Attack on the dark squares.
- Massive exchange of pieces to stress Black's weaknesses and to increase White's attack over dark squares.

Switching the offensive from the queen-side to the centre through the domination of the dark squares.

Some authors believe that the early exchange of bishops prevents the apparition of too strong tension in the position. This is why it is admirable to see how Fischer manages to create tension in the position.

4 ... 世xd7 5 0-0 全c6 6 世e2 (or 6 c3 全f6 7 星e1).

6 ... g6 (or the plan ... e6 - 包c6 d5) 7 c3 总g7 8 舀d1 e5 9 包a3 包ge7 10 d4

Instead of preparing it with 10 a c2, Fischer breaks on the centre because he prefers open positions.

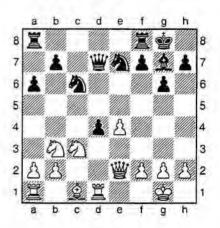

10 ... cxd4 11 cxd4 exd4 (11 ... 일xd4 12 일xd4 exd4 13 일b5 일c6 is better).

12 2 b5 0-0 13 2 fxd4 d5

Black gets hold of the centre trying to get rid of the weak d-pawn.

14 2 b3 a6 15 2 c3 d4

A superficial assessment would indicate that Black has solved his problems. But the matter is deeper. Fischer's plan is to start an attack over the dark squares starting on the queen-side and creating threats to drive Black onto the defensive.

16 월a4! Bae8 17 &f4! 월d5 18 쇼g3 발e7

Black will try to mount his counterplay attacking the e-pawn.

19 실ac5 설h8 (to prepare ... f5) 20 불e1 (threatening 21 exd5 and trying to maintain the tension).

20 ... 名b6 21 日ac1 f5 22 堂d2

White's pieces start to occupy all posts on dark squares to prevent Black operating on those squares, so reducing their scope.

22 ... 皆f7 23 exf5 gxf5

Olafsson has played actively, accepting several weaknesses in return. Now he is threatening ... f4. Fischer's plan now is to exchange as many pieces as possible to stress Black's weaknesses. Since this would not be enough, he combines this plan with an attack on the dark squares.

24 2d3 2d5 25 Ad6

(Note how the black pieces have to stay on light squares).

25 ... B q8 26 2a5!

The second plan: to exchange pieces to stress the weakness of d4 and f5.

26 ... 설xa5 (26 ... 설d8 is no solution due to 27 설e5).

27 Exe8 Exe8 28 Wxa5

It is recurrent in Fischer's games the fact that he reaches many positions with the King and Queen side pawns on their initial squares. This is because he prefers open positions and to exert pressure with pieces alone.

28 ... h6 29 g3 \$h7 30 \$2f4 \$2xf4

White's threats are on dark squares: \$\mathbb{E}\$ c7.

33 ... 增f7?! (better 增g6) 34 昌e7 增g6 (34 ... 增xe7 35 增xf5+ and 36 增xc8). 35 臣xb7 f4 (the idea is ... 皆b1+) 36 皆d5! (covering e4 and defending against all the threats).

36 ... 直e8?! 37 &xf4 直e1+ 38 堂g2 쌀d3 39 堂h3 쌀g6 40 直d7! h5 41 堂g2 h4 42 互d6! Black resigns.

A dark-square symphony!

Najdorf - Fischer Havana (OI), 1966.

1 d4 2f6 2 c4 c5.

The Benoni - Fischer's main weapon has always been the King's Indian. From time to time he adopted the Benoni, the Grünfeld, the Nimzo-Indian and some variations of the Queen's Gambit.

3 d5 g6 4 월c3 요g7 15 e4 d6 6 월f3 0-0 7 요e2 e6 8 0-0 exd5 9 cxd5 목e8

Thematic: pressure over e4 to prevent e4-e5 with a real break-through.

10 全d2

White's plans involve posting a knight on c4 to exert pressure over d6, not allowing massive exchanges of pieces, maintaining the tension and trying to put Black against as many threats as possible: attacking d6, threatening e5 or attacks on both flanks.

10 ... 일a6 11 f3 일c7 12 a4 b6 13 알h1 일d7

To answer White's ac4 with ... ae5. In the Benoni, Black must be always on the alert, but it also demands a great deal of "feuding."

14 ac4 ae5 15 ae3 f5

And the Benoni also demands to be the first in hitting, if Black does not want to end up being kicked out from the board. With the text, Black tries to de-activate White's threat of e5.

16 f4 일f7 17 exf5 gxf5 18 요d3 발f6 19 일e2

White's plan is now to attack the f5 pawn.

19 ... 包h6 20 包g3 世g6 preventing 21 包h5. 21 世c2 目f8 27 总d2 总d7 23 目ae1?!

23 🖺 f3 has been suggested as better.

23 ... Bae8 24 Ae2?!

Here 24 &c3 is clearly better. White is not aware of the fact that against Fischer all dilatory tactics are doomed to disaster.

24 ... ≜e7 25 &d3 to prevent ... ≜fe8.

25 ... Ad4!

Even in apparently closed positions the maintenance of the positional tension without losing time and without allowing your pieces to interfere with each other is of paramount importance. Fischer has detected the key moment and is ready to carry out a positional transformation to convert his positional advantage permanent initiative. He manages to do this in his games because he is always thinking in terms of dynamism (always dealing with the of creation threats and activation of his pieces, always fixing new targets for them so forcing his opponents either to engage in active fights or to defend.) In this respect, it is very interesting to see his games against Petrosian - in the same way that it would have been very interesting to see how he would have played against a chess opponent like Karpov.

Why? Because both Petrosian and Karpov are experts at "drying up" the games.

26 b4 Axe3!!

A very deep concept. The bishop is exchanged for the knight. It starts also a deeply-conceived plan which bears the mark of a genius: to appreciate when standard rules can be discarded and allow the exceptional to take over.

27 Axe3 音fe8 28 bxc5 bxc5 29 &d2

Najdorf cunningly sets a trap by offering his d5-pawn as bait. It is necessary to possess Fischer's degree of geniality to perceive all the nuances, and his tactical insight perceive all the possible moves. intermediate Fischer readily takes the pawn, withstands the ensuing attack and then manages to improve his superiority, stopping all White's attempts. Tactically speaking, he is in command of the game. He seems able "to see" everything.

24 ... 且xe1 30 且xe1 且xe1 31 Axe1 名xd5 32 Ac4

Here lie Najdorf's hopes. But Fischer had calculated that he could reorganise his pieces creating threats.

32 ... 性e6 33 &c3 &c6 34 性b3 (34 名h5 名g4 35 h3 名ge3.)

34 ... 含f7 35 皆b8 含g8! 36 h3 (36 皆xa7 含ge7 threatening ... 皆e3.)

36 ... 包ge7 37 增h8 增h6! 38 包e2 &xa4 39 增a8 &c6 40 增xa7 增e6 41 增a2 增e4! (threatening 增xg2 after 增g6 or 增e8). 42 &d2 호e8 43 월g3 발d4+ 44 합h2 월e3! (forcing the exchange BxN due to the many threats over c4, f4 and g2.)

45 &xe3 쌀xe3 46 &g8 쌀xf4 47 쌀f7+ 알d7 48 &xh7 &e4 49 &g6 쌀e5 50 &h5 &d5 51 쌀e8+ 알c7 52 堂g1 쌀g7 (threatening ... f4).

53 &d1 (threatening &a4) &c6! White resigns.

A typical game by Fischer with:-

- O Incisive opening play
- Maintenance (unrelenting) of positional tension to obtain positional advantage always forcing the opponent.
- Transformation of the positional advantage into initiative.
- Acceptance of a tactical clash.
- Deep tactical insight.
- Unrelenting creation of threats.

In short, dynamic conception of chess at its best. Fischer seems always to be one step ahead of his rivals or two!
